Introduction

American Family and Friends 2nd Edition is a complete six-level course of English for children in primary schools. It uses a clear grammar-based curriculum alongside parallel syllabi in skills and phonics. In this way, children develop the confidence and competence to communicate effectively in English, as well as understanding and processing information from a wide range of sources. The course combines the most effective literacy techniques used with native English speakers with proven techniques for teaching English as a foreign language to children.

Children have different learning styles. Some learn better by seeing (visual learners), some by listening (auditory learners), some by reading and writing, and some with movement (kinesthetic learners). *American Family and Friends 2nd Edition* uses all of these approaches to help every child realize his or her potential.

It also looks beyond the classroom and promotes the values of family and friendship: co-operation, sharing, helping, and appreciating those who help us.

This level of *American Family and Friends 2nd Edition* includes the following:

- Student Book
- Workbook with Online Practice
- Student website with Online Play
- Teacher's Book Plus containing:
 - Teacher's Resource Center
 - Fluency DVD
 - Online Practice
- Classroom Presentation Tool
- Class Audio CDs
- Alphabet Book
- Readers
- Teacher's Resource Pack containing:
 - Flashcards
 - Phonics cards
 - Values posters

Also available as supplementary material, *Grammar Friends* is a six-level grammar reference and practice series that matches the syllabus of *American Family and Friends 2nd Edition*. The grammar is presented within everyday contexts familiar to pupils from the other materials they use in class. The course can be used as supplementary support and resource material providing practice and reinforcement in class or at home.

Methodology

Words and grammar

New words are introduced in relation to each unit's topic or theme. They are presented in the Student Book with support from the flashcards and recordings, and are then practiced with chants, songs, and motivating classroom games and activities.

The children are first exposed to the new grammar items alongside the key words in the unit stories. They then move on to focused grammar practice, which is reinforced with a range of spoken and written activities.

Skills

Each unit of *American Family and Friends 2nd Edition* contains two pages dedicated to the development of reading, listening, speaking, and writing skills.

The reading texts in this section expose children to a balance of both familiar and new language. With a range of different text types of increasing complexity, children develop the confidence to recognize and use the language they know in a wide range of situations. They develop the skills of reading and listening for gist and detail, both of which are essential for complete communicative competence.

The writing skills section provides a complete course in English punctuation, syntax, and text structuring. The syllabus resembles that used with children who are native English speakers.

Phonics

Phonics teaches the relationship between letters / letter combinations and the sounds they make. The study of phonics enables children to decode new words, thereby improving reading skills and helping them to grasp spelling and pronunciation patterns quickly.

American Family and Friends 2nd Edition draws on the principles of synthetic phonics, in which sounds and letters are combined to form whole words (i.e. synthesis).

Every unit contains a phonics lesson. In Level 3, children revise common consonant blends and long vowel sounds from Level 2. They then learn some alternative common long vowel patterns, more consonant blends at the ends of words, and two new sounds (/ɑ:/ and /ɔ:l/). By the end of Level 4, children will be able to identify and spell all of the most common sounds in the English language and recognize that many sounds can be spelled in different ways.

Stories

Every unit contains a story which provides a fun and motivating context in which the new language appears. In Level 3, we meet a happy extended family and see the amusing adventures of Max and Holly and their Australian cousins, Leo and Amy.

The stories also provide ideal scenarios for practicing and reviewing language structures and key words in a cyclical manner.

Animated versions of these stories can be found on the Student Website, Fluency DVD, and Classroom Presentation Tool. They offer an effective way of presenting the story and target language in class, or can be used at home to consolidate what children learn in the first two lessons of each unit.

Review units

After every three units there is a Review unit. These are shorter units of exercises which provide additional practice of the vocabulary and structures presented in the three preceding units. No new material is presented or practiced in these units. They can be used as a progress test to check that children have remembered what they have learned.

Grammar Time! pages

Grammar reference material is provided on pages 128–138 of the Workbook for children to complete and then refer to whenever necessary. On these pages there are grammar tables divided up into the grammar taught in each unit, with some spaces for children to complete. Once completed, they provide a reference which children can use to help them with their writing and other activities. These should be checked by the teacher once completed by the child, to ensure that they are a reliable reference tool. Below each grammar table are exercises which give further practice of the grammar.

Classroom management

Children learn best when the atmosphere in the classroom is relaxed, happy, and well-ordered.

Success is a great motivator. Try to make every child feel successful and praise their attempts enthusiastically.

Children should all be familiar with expressions such as, *Good work! Good job! Excellent try! You did that very well.*

Errors need to be corrected, but use positive and tactful feedback so that children are not afraid of making mistakes. If a child makes a mistake, say *Good try. Try again*, then model the correct answer for the child to repeat. Avoid using words such as *No* or *That's wrong*, as these can create negative associations to learning.

Establish a clear and consistent set of classroom rules and ensure that all the children know what to expect. Always praise good behavior so that bad behavior does not become a means of gaining attention.

Songs and chants

Every unit in *American Family and Friends 2nd Edition* contains a song for children to practice the new language, as well as vocabulary and phonics chants.

Melody and rhythm are an essential aid to memory. By singing, children are able to address fears and shyness and practice the language in a joyful way together. They are also fun and motivating activities and are a good opportunity to add movement to the lessons.

Games

Games provide a natural context for language practice and are very popular with children. They promote the development of wider cognitive skills such as memory sequencing, motor skills, and deductive skills. If required, all the games in *American Family and Friends 2nd Edition* can take place at the children's desks with a minimum of classroom disruption.

Involving parents

Learning involves a co-operative relationship between home and school, and it is important to establish clear communication with parents to encourage home support. The following are suggestions about possible ways of doing this:

- Keep parents informed about what their children are learning and their progress. Parents might benefit from receiving newsletters listing what children are now able to do, and what words and phrases they are studying.
- Show parents the completed Values worksheets from the Teacher's Resource Center.
- Organize a concert or parents' afternoon where the children can perform the unit stories, plays, and the songs they have learned, along with their actions.

Oxford Parents is a website where your students' parents can find out how they can help their child with English. They can find lots of activities to do in the home or in everyday life. Even if the parent has little or no English, they can still find ways to help. We have lots of activities and videos to show parents how to do this.

Studies have shown that practicing English outside the classroom can help children become more confident using the language. If they speak English with their parents, they will see how English can be used in real-life situations and this can increase the students' motivation. Parents can help by practicing stories, songs, and vocabulary that the students have already learned in the classroom. Tell your students' parents to visit www.oup.com/elt/oxfordparents and have fun helping their children with English!

Games

Flashcard games

Quick flash

- Take the flashcards and hold them facing you so that the children can't see them.
- Tell the children they are going to see a flashcard for a very short time. They must call out the word.
- Choose a flashcard, reveal it for a few seconds only and ask *What's this?* Children call out the word. Choose a child to select the next card and 'flash' to his/her friends.

Can you see?

- Cut a hole in a piece of paper or card which is bigger or the same size as the flashcards. The hole should be about 5cm across, or 7cm if you have a big class.
- Choose a flashcard without showing the children and put the paper with the hole in front of the flashcard.
- Move the piece of paper around so that children see glimpses of the flashcard beneath. Ask *What's this?* or another appropriate question.
- The first child to call out the answer correctly comes to the front to choose the next flashcard.

Teacher can't remember

- Tell children you can't remember some of the words from a particular vocabulary set so you want them to help you.
- Tell children you are going to show them some flashcards and say some words.
- If the word is correct, children do an agreed action, such as tapping their desks, clapping, or calling out *Yes!*
- If the word is incorrect, children do another agreed action, such as standing up, and then they all call out the correct word.
- Show flashcards and say correct or incorrect words. Children say the word.

Cross the river

- Draw a river on the board, with two sets of four stepping stones across it. You could add dangers like crocodiles in the river. Write *Team A* and *Team B* underneath the two sets of stepping stones.
- Divide the class into two teams. Tell children you are going to show each team different flashcards. Each team must guess their words correctly to move across the river.
- Show one team a flashcard and choose a child in that team to give the answer.
- If the child answers correctly, write the word on that team's first stepping stone. If the child answers incorrectly, as the other team to tell you the word, and write the word on that team's first stepping stone.
- The first team to complete the four stepping stones with words crosses the river and wins.

I spy

- Put the flashcards up around the room where everyone can see them.
- Say *I spy a word beginning with (a letter).*
- Children call out any words that start with that letter.

- The first child to call out the correct word chooses another word and continues the game.

Mime the word

- Play this game for vocabulary sets that can be easily mimed. Pick a flashcard and mime the word for children to guess.
- Give a child the flashcard and tell him/her not to show it to the class.
- Tell the child to mime the word on the flashcard and tell the rest of the class to guess the word.
- After they have guessed, the child holds up the flashcard to show who guessed correctly.
- Continue with different children miming other words.

Flashcard circle

- Do this activity if you can form a circle in your classroom. Give a child one of the flashcards you are studying and ask him/her to say the word, and then pass the card on.
- Each child says the word as s/he receives the card.
- After a few children have said the first word, introduce a second flashcard.
- Gradually introduce all of the flashcards, so that they are all going around the circle.
- Shout *Stop!* at different points and ask the children holding each of the cards to hold them up and say the words.

Listen, point, and say

- Place flashcards for the key vocabulary around the classroom.
- Call out a word, e.g. *library*. The children point to the correct flashcard.
- Now point to a different flashcard and children say the word.
- Repeat with all the flashcards, alternating between calling out the words and pointing to the flashcards.

Snap!

- Write one of the items from the vocabulary set on the board, e.g. *fountain*. Say the word aloud.
- Put the flashcards in a pile and hold them up so that children can only see the facing card. Reveal the cards one at a time by putting the front card to the back. When children see the fountain, they shout *Snap!*
- Repeat with the rest of the words in the set.

Whispers

- Organize children in groups of at least six. Show a flashcard to the first child in each group. This child whispers the word to the child next to him/her.
- Children continue whispering the word to the child next to them until the word reaches the final child.
- The final child says the word aloud, and the first child holds up the flashcard to see whether the word and the flashcard are the same.

Where was it?

- Lay a number of flashcards face up on your table or on the board. Give the class five seconds to look at the cards.
- Now turn all the cards over so that they are face down.
- Ask, *Where's the paintbrush?* The children try to remember the position of the card.
- Give several children an opportunity to guess. Ask them to say the word before they point to the card.
- Ask about a number of different vocabulary items.

What do I have?

- Use the flashcards to elicit the vocabulary for the game.
- Hold up one card and say *What do I have?* Children guess the word.
- When the card has been guessed, put it on the board.
- Hold up a second card and repeat until all the cards are on the board.

What's missing?

- Display the flashcards from the vocabulary set on the board. Point to each one in turn for children to say the word. Give the class a few seconds to look at them.
- Ask children to turn around. Remove a card.
- Children look at the board again as you say *What's missing?*
- When children have identified the missing card, shuffle the cards again and repeat the procedure.

More games

Quickly, slowly

- Ask children to stand at their desks. Call out a series of known action words for children to mime. Each time you give an instruction, say *quickly* or *slowly* as well.
- Children do the actions, e.g. pretending to read, very fast or in slow motion, depending upon your instruction.
- Children who do the wrong action or the correct action but at the wrong speed have to sit down.

Miming snap

- Choose a word from the vocabulary set that children are learning, or any other word that children know and you want to focus on. All the words must be things that can be clearly mimed.
- Say a word and mime the action. If the word matches the mime, children should *Snap!* If the word doesn't match the mime, children can be silent, or do an agreed action.
- Choose a child to mime another action. The child says a correct or incorrect word while s/he mimes the action.

Target words TPR

- This activity is particularly good with writing activities that focus on words like connectors and sequencers.
- Assign target words, e.g. *and* and *but* to children in the class by counting along the rows of children.
- Read out sentences containing the target words. Children must stand up or do another agreed action when they hear their word.
- Read out the sentences again, this time leaving a blank for the target word. Children who have been assigned that word stand up and say it.

Do it!

- Assign each child a word from the vocabulary set you are covering, e.g. *flamingo, zebra, camel*.
- Give instructions, e.g. *Flamingos, jump! Camels, clap!* Children who have been assigned that word do the action.

Freeze

- Ask the children to stand at their desks. Give a series of instructions, e.g. *swim, waterski, jump*. Children mime the actions.
- When you say *Freeze!* the children must stop what they are doing and stand still.
- The children who are the slowest to stop are out and have to sit down. Continue the game until there is one winner left standing, or a small group of winners if you prefer.

Simon says...

- Ask children to stand at their desks.
- Explain that you are going to give instructions. If the instruction begins with the words *Simon says...*, children must do as you ask. If not, they should stand still and wait for the next instruction. Any child who gets this wrong is out of the game and should sit down.
- Give an instruction that is relevant to the unit's language, e.g. *Simon says...point to your nose; Simon says...point to something red; Simon says...eat an apple*.
- Every now and then insert an instruction which is not preceded by *Simon says...* to see which children are paying attention.
- Continue the game until there is one winner.

What's the picture?

- Invite a child to come to the front of the class and whisper the name of an object s/he has to draw.
- The child draws the picture on the board for the rest of the class to guess what it is.
- The first child to guess the object correctly comes to the front of the class to draw the next picture.
- Repeat until all of the target vocabulary has been used.

A long sentence

- Say a sentence that ends with a word or phrase from the vocabulary set that you want to practice, e.g. *I'm going to the sports center*.
- Choose a child to continue the sentence, adding a new word to the end, e.g. *I'm going to the sports center and the movie theater*. This child then chooses another child, who says the sentence, adding another word to the end of it.

Bingo

- Ask children to draw a grid, three by three (or three by two) squares. In each of the squares they write a different word from the vocabulary set they are studying.
- Call out words from the vocabulary set in any order. Keep a record of the words as you say them so that you don't say the same word twice. Children cross off the words in their grids as they hear them. The first child to complete a line of three shouts *Bingo!* and is the winner.

Fluency development

A sense of achievement and a sense of autonomy are essential ingredients in promoting fluency. The Fluency Time! Lessons in *American Family and Friends 2e* give learners the opportunity to personalize the language they learn and to practice speaking together in pairs and groups, to play games using the new language and to create their own dialogues, and to help boost their confidence and motivate them in the classroom.

It is important for language in the classroom to be meaningful and functional, so that learners can see how the language they are learning can be applied to everyday life. When learners are able to use the language they learn to communicate in a realistic situation, or to interact socially with others, they feel a sense of purpose in their learning.

Syllabus

The syllabus for the Everyday English phrases is based, in part, on the Cambridge English: Starters syllabus. Other useful phrases, which reflect daily life, have also been included. For learners who are preparing for the Cambridge exams, this will provide additional preparation and practice for the speaking parts of the exam, but for those not taking the exams, the Everyday English phrases will be equally useful and applicable to the situations they may face in the future.

In the Student Book and Workbook

The Fluency Time! lessons in *American Family and Friends 2nd Edition* provide learners with useful language for a variety of everyday situations.

Each of the five Fluency Time! lessons in *American Family and Friends 2nd Edition* consists of an Everyday English page followed by a craft page. The Everyday English pages teach phrases through mini stories in a meaningful context, and provide practice of the new language through a listening activity and a speaking activity, providing a gradual transition from receptive to productive skills. The craft pages give instructions for a craft project related to the context, and provide further, freer practice of the Everyday English phrases through a communicative game or speaking task, which involves acting out dialogues and using the craft object. In this way, learners can personalize and build on the key phrases, extending the language to incorporate recycled vocabulary and structures from the units they have covered so far.

The Workbook provides further written practice of the Everyday English language, including activities based on the Fluency Time! DVD.

In the Fluency DVD

The Everyday English dialogues are also presented in the new Fluency Time! DVD. The key Everyday English language is acted out by native speakers in various real-life locations. You can find suggestions on when to use the DVD in the Everyday English teaching notes.

21st Century Learning

The Four Cs

As our world becomes increasingly interconnected, today's young students must develop strong skills in creativity, collaboration, communication and critical thinking.

Creativity

Creativity is an essential 21st Century Skill. Students who exercise and demonstrate creativity are better prepared to solve problems, make changes and express themselves clearly. Creativity can be fostered through project work and other arts-based hands-on experiences. However, creativity is also about thinking processes. Creative thinking can be encouraged through asking students interesting questions and having them ask their own questions. Using different techniques to approach problem-solving also helps students to internalize meaning in a personal way. *American Family and Friends 2nd Edition* encourages creativity through the use of interesting texts which stimulate personal responses, craft activities which help students to understand the world around them and projects which require them to problem solve and express themselves.

Collaboration

Collaboration requires direct communication between students, which strengthens the skills of listening and speaking and the associated skills of turn-taking, clarifying, explaining, and discussing. Students who work together often achieve better results, as they benefit from each other's strengths. But they also develop a sense of team spirit and pride throughout the process. *American Family and Friends 2nd Edition* offers opportunities for collaboration in every unit. Whether it is through project work, group games, or team discussions, students are sharing ideas, expressing personal opinions, and developing important social skills.

Communication

Communication forms an important part of collaboration. Students need to learn the skills of listening, speaking, reading, and writing to effectively take part in an age of rapid change. As our world becomes increasingly interconnected, today's young students must develop skills that allow them to communicate in a variety of ways, including oral and written skills, but also digital communication skills.

Critical Thinking

Students in the 21st century need to do more than acquire information. They need to be able to analyze the information by making sense of it critically. Critical thinking skills help students to determine facts, prioritize information, understand relationships, solve problems, and deal with an ever-changing world. *American Family and Friends 2nd Edition* encourages children to think about language, to focus on meaning, and to react to the world of English in a personal way. Subject areas are introduced so that students can make connections between content and language, interesting facts are presented, and children are invited to be curious and questioning.

Values

Values, which can also be called civic education, are a key strand in *American Family and Friends 2nd Edition*. Teaching values is important as it focuses on the whole child, not just language skills. It improves children's awareness of good behavior, and how their behavior and attitudes can impact on the people around them and their environment.

Areas for values teaching include helping children to understand about:

- Community, e.g. agreeing and following school rules, understanding the needs of people and other living things, understanding what improves and harms their environment, contributing to the life of the class and school.
- Health and hygiene, e.g. understanding the basics of healthy eating, maintaining personal hygiene, rules for keeping safe around the house and on the road.
- Interacting with others, e.g. listening to other people, playing and working co-operatively, sharing, identifying and respecting the differences and similarities between people, helping others in need.

Values are highlighted throughout the course in various places:

- In the five Values posters at this level.
- In the Values worksheets in the Teacher's Resource Center.
- In the exemplification of good behavior throughout the course, in particular in the Student Book stories.
- In the co-operative learning activities throughout the course, which encourage children to work together and co-operate in order to complete activities.

CLIL

CLIL (Content and Language Integrated Learning) refers to teaching subjects (such as science, math, art, geography) through a foreign language. CLIL increases motivation by presenting language in natural, real-life contexts, which interests students and encourages them to communicate. *American Family and Friends 2nd Edition* provides five CLIL spreads to enable students to learn cross-curricular content and English simultaneously.

In the Student Book and Workbook

All of the CLIL lessons in *American Family and Friends 2nd Edition* focus on a school subject. The content areas are carefully chosen to be interesting to students, while at the same time not overwhelming them with too much new information.

The CLIL pages in the Workbook provide further practice of the new language through reading, writing, listening, and speaking activities, ensuring that the students have plenty of practice of the new language and content in all four skills.

CLIL topic

Students are introduced to the subject topic and new vocabulary is pre-taught through a vocabulary presentation activity, supplemented by flashcards. The students read a text based on the lesson topic and complete a comprehension activity. A critical thinking activity is always included so that students can personalize the topic and the new language.

CLIL project

The vocabulary and skills focus is followed by a project related to the topic. This allows students to create something which demonstrates their understanding of the concepts and language from the subject lesson. It is followed by a stage where students present their projects to the class, increasing spoken confidence and general presentation skills.

Differentiation

Most classes contain students with mixed abilities. *American Family and Friends 2nd Edition* provides support for students who may be above or below the average level of the class. The Teacher's Book contains suggestions on how to make activities easier for students who require more support, or more challenging for students who need more independence. This ensures that all students remain confident and motivated throughout your lessons.

Classroom tips for mixed ability classes

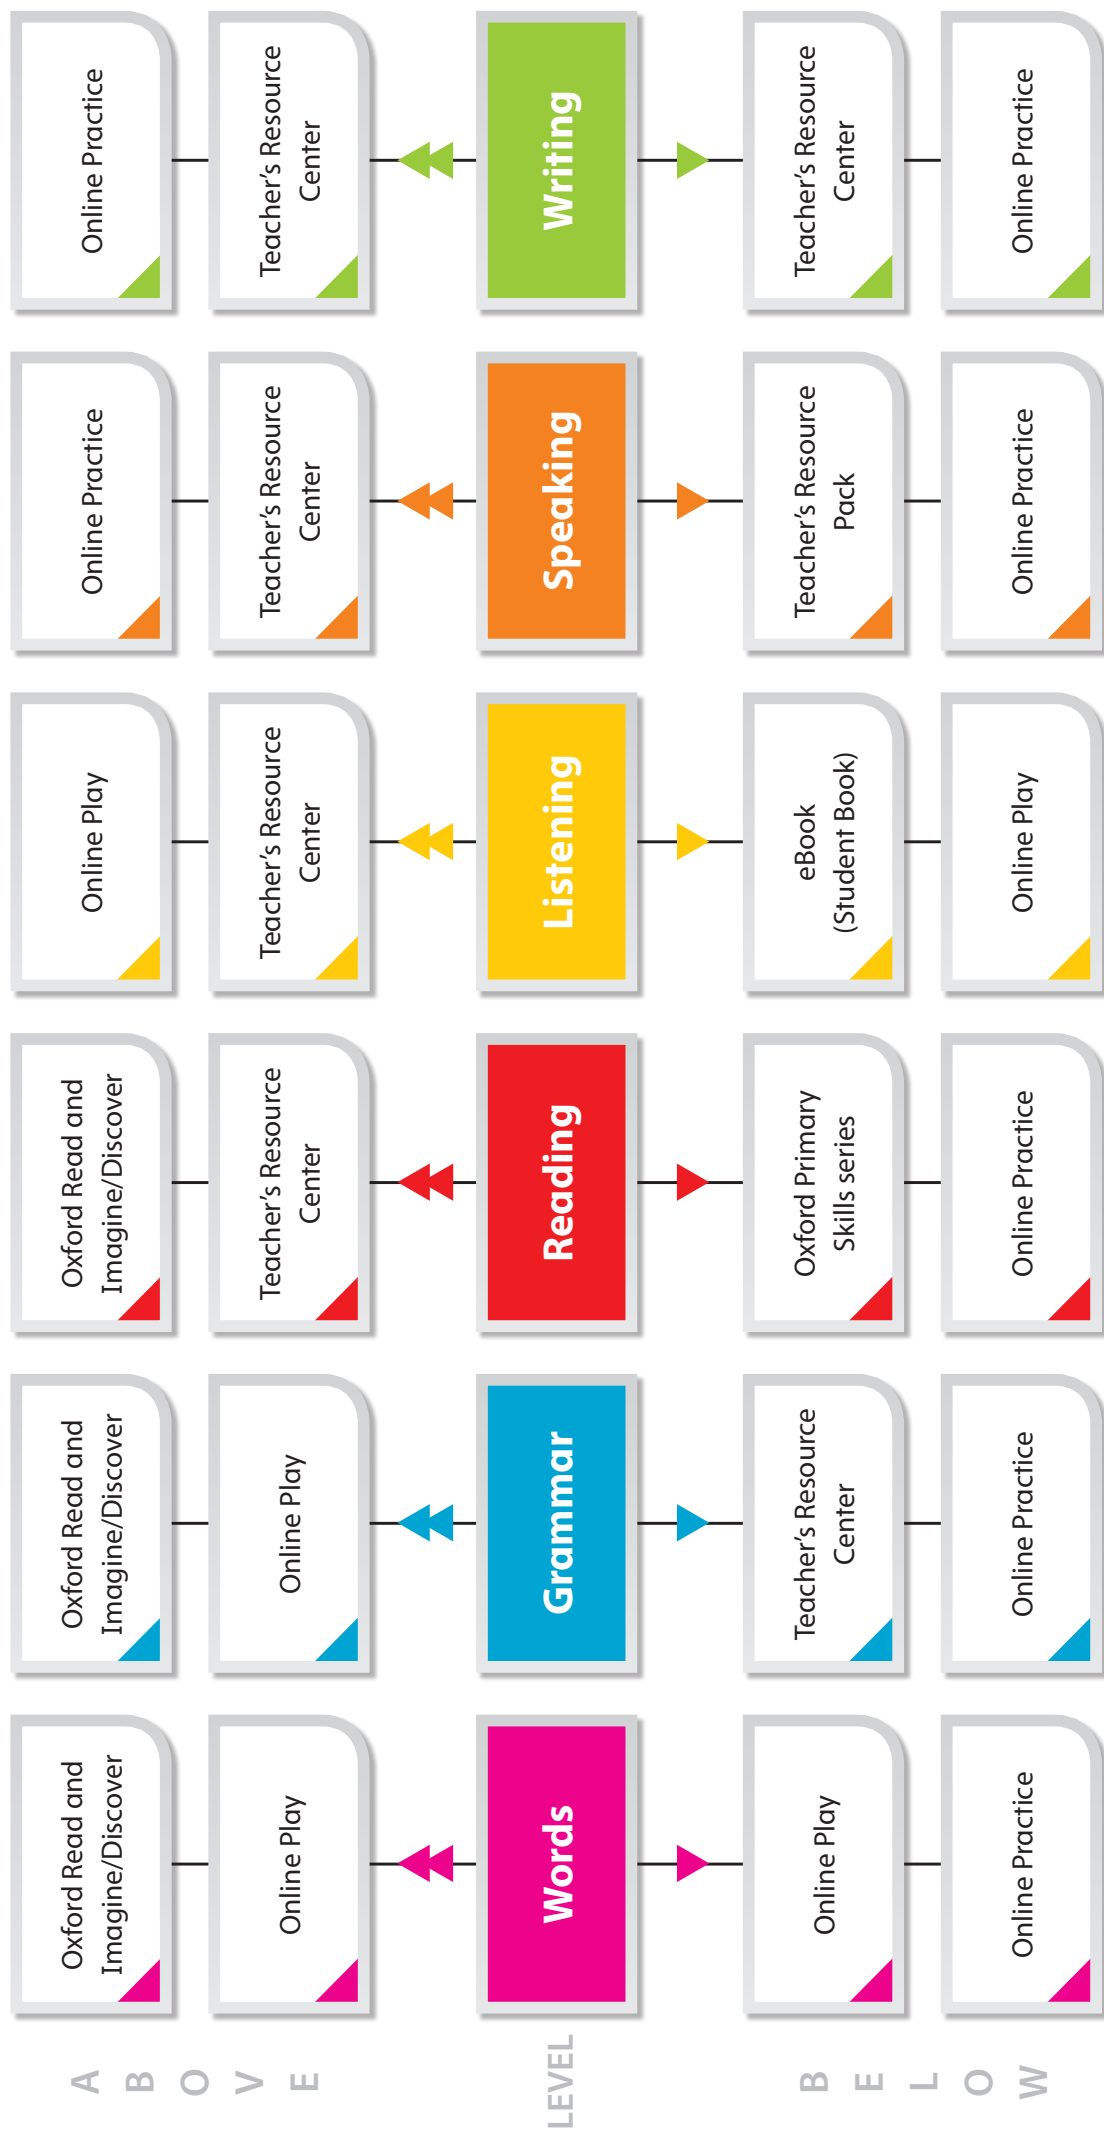

- Think about where your students are sitting. Place less confident students closer to you, so that you can deal with any issues.
- Some more confident students may enjoy being "volunteer teaching assistants". This will allow confident students to revise new language while helping other students to learn it.
- Give simple, clear instructions so that students of all levels can understand you easily. Use hand gestures as well as words to explain the activities.
- Don't grade your language as much when talking to confident students. They will benefit from the extra natural language input and one-to-one interactions will encourage them to explore language further.
- Set goals for each lesson to help the students to focus. The goals can be different for each student, depending on their abilities, but reaching the goals will give the same sense of achievement to all students.

Support and extension material

There is a wealth of support and extension material available to *American Family and Friends 2nd Edition* students, offering additional practice in skills, vocabulary, and grammar. The Online Practice and eBooks, as well as the *Oxford Skills* series and *Grammar Friends*, provide plenty of reinforcement for less confident students and further practice for confident students.

American Family and Friends 2nd Edition includes a diagnostic test to be completed at the start of each year. This will enable you to assess your students' abilities and decide which material will be most useful. The progress tests after every three units will help you to check your students' progress and provide reinforcement where necessary.

Drama in the classroom

How to present the stories

Each story is spread across two lessons and has a receptive and a productive stage. In the first lesson (receptive stage), children listen to the story and follow it in their Student Books. In the second lesson (productive stage) the children recall the story, listen to it again, and act it out.

Acting out the stories

There are various ways of acting out the stories, depending on the size and nature of your class.

Acting in groups

The following procedure is suggested in the teaching notes for each unit:

- Decide as a class on actions for each character at each stage of the story (children may suggest actions which are not shown in the pictures).
- Divide the class into groups so that there is one child to play each character. To keep disruption to a minimum, children could turn their chairs to work with those behind them and remain in their seats.
- Play the recording. Children practice the story in their groups, saying their character's lines (if they have any) and doing their actions. Props can be used if you wish, or you may prefer objects from the story to remain imaginary.
- At the end of the exercise, invite some of the groups to act out their story at the front of the class.

Acting as a class

As an alternative, you may wish to act out the story as a class:

- Decide together on actions for the story which children can do at their desks without standing up (e.g. they could "walk" their fingers to show that the character is walking).
- Play the recording to practice reciting the lines. Children mime the actions for each character as they speak.
- Play the recording again for children to give their final performance.

Acting with a "lead group"

This is a combination of the two previous procedures:

- Decide on actions for the story as above.
- Divide the class into groups so that there is one child in each group to play each character. Children should all be facing the front of the class and not the other people in their groups. They won't need to leave their seats.
- Ask one of the groups to come to the front of the class.
- Play the recording. The group at the front demonstrate the actions to the class.
- Play the recording again for the rest of the children to join in with the actions.

Class plays

The Teacher's Resource Center contains two plays for the whole class to act out, one at the end of each semester.

Preparing the plays will take several lessons: discussing the play and allocating parts, deciding on and organizing props and costumes, and finally, rehearsing. If possible, arrange a performance of the plays for parents.

Assessment

Children's progress can be evaluated through ongoing assessment, self-assessment, and formal testing. *American Family and Friends 2nd Edition* offers a comprehensive range of course assessment and practice for external exams such as Cambridge English: Young Learners (YLE).

The Course Tests section in the Teacher's Resource Center offers:

- suggestions for ongoing classroom assessment
- an assessment sheet to keep a record of children's progress
- suggestions for encouraging children to self-assess
- a diagnostic test
- 16 unit tests
- 5 progress tests (for use after every three units)
- 5 skills tests (for use after every three units)
- 5 Fluency Time! skills tests

The Cambridge English: YLE Practice section in the Teacher's Resource Center offers:

- Notes, tips, and vocabulary lists for the Starters tests
- Preparation and practice tasks to help children become accustomed to the YLE task types
- The Preparation stage provides controlled practice of task types found in the Movers tests, to help children gradually build up to the task.
- The Practice task then gives children a taster of a Cambridge style test before they attempt a complete YLE Practice Test
- Sample YLE Practice Tests for the Movers Reading and Writing, Listening and Speaking tests

Further information on testing and assessment (including the scoring system) can be found in the introduction sections of the Teacher's Resource Center.

Digital learning

The use of technology in language learning can allow the teacher to become a facilitator and a moderator, whilst the student is able to work more independently, connect to additional resources, and transfer knowledge both within and beyond the classroom. Immediate collaboration and feedback are also significant benefits of effective technology implementation, through the use of tablets, classroom presentation tools, and learning management systems.

eBooks

American Family and Friends 2nd Edition can be accessed in its print edition or in eBook form. eBooks are most commonly accessed on tablets, although they can also be used on laptop computers. Tablets provide a large amount of flexibility, not only because they allow students to store an enormous amount of text books and information on one, small device, but also because they contain innovative learning tools which can be used both inside and outside the classroom.

Learning Outcomes

Students can easily use tablets to help them search for vocabulary, translation, and pronunciation, as well as images, audio, and video. However, to ensure that the tablets are used effectively as a learning tool, teachers need to think about the following points:

- How will using the tablet help fulfil our learning outcomes?
- How will students be using the tablet?
- What is my role when the tablets are being used?

Fundamentally, tablets are just another useful tool to assist in language learning. Different learning outcomes will lead to varying amounts of tablet use. Just as with print textbooks, students need time to work together to complete exercises and activities, to check their work, and to discuss ideas and work on projects. Spoken production should still be an important part of the lesson.

Classroom management

An eBook based lesson must be a controlled, well-planned lesson. Before starting, think about whether you want your students to work in groups or individually.

Independent work

- If each student has a set of headphones, they can work independently without disturbing others.
- Ask students to turn their devices face down until you tell them to start working in the eBooks. Tell students that they should complete interactive activities only when you give the go-ahead.
- Only upon your instruction should students press the “check answers” button.

Group / paired work

- Put students into groups with one device per group. Students can take turns to answer a question within interactive activities.
- Groups can compete against each other for points.

Whole class work

- Designate one student to play audio on their device with the volume turned up for everyone to listen to as you work through the lessons.

Online Practice

For teachers

American Family and Friends 2nd Edition Online Practice is available using the access code in the Teacher’s Book Plus. It allows teachers to:

- Create online classes for the course using the “Manage Classes” feature.
- Assign work directly linked to the Student Book.
- Set practice activities dedicated to the course vocabulary, grammar, and skills.
- Track student progress by viewing detailed class and student reports.
- Engage students in various forms of written English such as email and forum discussion.

For students

Online Practice is available to students using the access card in their Workbook (with Online Practice). Students will be able to:

- Complete specific language-focussed activities that link directly to the course.
- Have their work automatically scored and graded.
- Share their work with other students in the “class” set up by the teacher.
- Send emails and take part in English discussions as their level increases.

Online Play

Online Play is a place for students to access the audio and video animations, downloadable activities, and to explore language further through fun vocabulary games and activities.

Audio

Students need to listen to English again and again in order to improve their receptive skills. Online Play offers a place where students can access the songs, chants, and target language at home.

Stories

Watching the unit stories come to life provides consolidation of the target language from the first two lessons of each unit.

Downloadable activities

There are a number of fun craft and downloadable activities for students to complete at home. These can be done in conjunction with parents but are also simple enough for students to work with by themselves.

Language games

Children need to have fun with language. These games encourage children to work with target language at their own pace and without being graded. Many games have more than one level, providing support for less confident students and challenge and extension for more confident students.

Tour of a unit

Lesson One Words and Story

Lesson 1 teaches and practices the first new vocabulary set. It also exposes the children to the story and grammar points they will be studying in Lesson 2.

The children listen and point to the pictures. They then listen again and repeat the words. This is reinforced with flashcard activities.

The children listen to the story and follow the words in their books.

Values posters are referenced at different points (one for every three units), so the activities can be done within the context of the story.

Teaching the words and presenting the story

Words

- Play the recording and hold up the flashcards. The children repeat the words and point to the correct picture in their Student Books.
- Show the flashcards randomly and ask the class to say the words. You can hide the cards behind your back.

Story

- Prepare the children for the story. Talk about each frame with the class. Ask simple questions such as *Who's this? Where are they? What's this?*
- Play the recording all the way through for children to listen and follow in their books.
- Ask some comprehension questions about the story.
- Play the recording a second time for children to follow again in their books.
- Ask the children to look in their Student Books and find and point to the words from Exercise 1 that appear in the story.

Workbook

The children practice recognizing and writing the new words from the lesson.

Values worksheets

Two Values worksheets for every three units accompany the Values poster (see page 11).

Online Practice allows children to practice the vocabulary further.

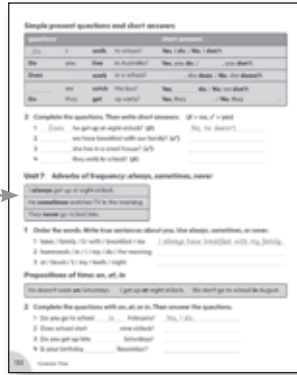

Lesson Two Grammar

Lesson 2 teaches and practices the grammar points presented in the story. The children also practice the language by acting out the story.

The children listen to the story again and now produce the language by repeating and then acting out the story.

The children study the grammar structure that was presented in the story.

The children can then work on the Grammar Time material at the back of the Workbook.

The children practice reading the grammar structure.

The children practice writing the grammar structure.

Lesson Two Grammar

- Listen to the story again and repeat. Act.
- Look and say.

Acting out the stories and teaching the grammar

Story

- Ask children what they can remember about the story from the previous lesson.
- Play the recording. Pause after each line for the children to repeat.
- Divide the class into groups, with each child having a different role in the story.
- As a class, decide on actions for the story. Allow the children to make suggestions and demonstrate the actions.
- Play the recording. Each child says the lines of his / her assigned character. Encourage children to perform actions as they speak.
- Repeat without the recording, encouraging the children to remember the sentences.
- You could move on to individual practice by calling groups to the front to act out the dialogues, with or without the recordings.

Grammar

- Teach the grammar through example rather than explanation.
- Read the grammar examples in the speech bubbles in the grammar box. Ask the class what is happening. Then ask some children to act out the frame.
- Then read the other sentences in the grammar box. The class repeats chorally. Write them on the board. Reinforce

meaning with actions. (If there is a tip box, read it to the class and write some examples on the board.)

- Use flashcards to substitute new words. The children will see how the grammar structure works with different words. The children repeat the new sentences.
- Do the first question in each exercise with the class, then encourage them to work independently. Check answers with the whole class.

Workbook

The children practice recognizing and writing the new grammar points from the lesson using the reference tables in the Grammar Time section at the back of the Workbook to help them.

Online Practice allows children to practice the grammar structures in different contexts.

Lesson Three Grammar and Song

Lesson 3 activates the grammar taught in the previous lesson in an oral activity. The grammar and core language is then practiced with a song and Total Physical Response activities.

The children look at the oral grammar activity and do the activity in pairs, using the language in the speech bubbles as a model. This activity activates the new grammar that the children have learned and enables them to use it orally.

The children then practice the grammar further by writing sentences based on the oral grammar activity.

The children learn and sing the song.

The children perform actions as they sing the song.

Lesson Three Grammar and Song

I never shop or cook.
I sometimes surf the internet,

I always have a lot of fun,
So come and play with me!

Teaching the oral grammar activity

- The oral grammar activities can either be done by children in pairs at their desks, or they can be done in 'open pairs' across the classroom. Alternatively, you can bring two children to the front of the class to do this activity.
- The activities vary from unit to unit. For example, in some units, one child in the pair silently chooses one person or picture and gives clues about it until their partner is able to say who or what their partner is thinking of. In other units, one child in the pair has to look at the picture and make false statements about it which their partner has to correct. In every unit, the text in the speech bubbles provides a model for how the activity should be done.
- The oral grammar activity is followed by a written activity which consolidates and practices the grammar further. It can either be done in class or set for homework. A model is provided on the page.

Teaching songs

- Play the song to the class. The children listen and point to the pictures to show understanding of the words.
- Recite the words of the song with the class, without the music. Say each line and ask the children to repeat.
- Now sing the song with the class a number of times with the recording.

- Teach actions to accompany the song (see the suggested actions in the lesson notes, or ask the children to suggest their own).
- Sing the song again, this time with the actions.
- You could allow some children to provide accompaniment with drums, shakers, etc.

Workbook

The children practice the new structures from the unit. They then go on to practice the language in the song (they will sometimes need to look back at the song text in their Student Books).

Lesson Three Grammar and Song

1 Write. Use the words in the box to complete the sentences.

2 Write five sentences about you. Use some, sometimes, or always.

3 Read the song in the Student Book. Check off the items.

Lesson Four Phonics

Lesson 4 teaches phonics: the relationship between a sound, the letters that form it, and words that contain it.

The children listen to the sound or sounds and point to the letters that form them. They read and repeat words that contain the sounds and letters, with the help of phonics cards.

The children see these words in sentences and learn a chant. The chant provides targeted pronunciation practice within an engaging context.

The children look at the chant again and identify the letters that create the phonics sounds.

The children practice the sounds in varied activities.

Lesson Four Phonics

1 Listen, point, and repeat. 🎧

cow clown flower house round mouse

2 Listen and chant. 🎧

The clown has flowers, Red and blue, He has a round nose, But only one shoe. He has orange hair, He's in his house. He jumps on a chair, He's scared of a mouse!

3 Read the chant again. Circle the words with ow and ou.

4 Circle the odd one out.

1 cow house flower 2 clown cow round
3 flower house mouse 4 house clown round

5 Write the words in the correct box.

brown out down clown shout cloud round flower

Teaching phonics

- Introduce the new sounds and the letters that form them one at a time. Show the class the phonics card and say, for example, *Letters O and W make the sound /aʊ/*. Model the sound a number of times for children to repeat.
- Introduce the new phonics words with the phonics cards and recording.
- Play the chant to the class. Talk about the picture to ensure the meaning is clear.
- Repeat the chant, this time asking the children to clap their hands (or perform another action) every time they say a word that contains the target sound.
- For Exercises 4 and 5, complete the first example as a whole class activity. Then encourage the children to work independently. Finally, check the answers with the whole class.
- In the Review sections, the children distinguish the new sounds from others they have learned previously.

Workbook

The children practice recognizing and writing the words containing the phonics sound(s) and letters.

Lesson Four Phonics

1 Complete the words with one or two letters. Write the word in the box or on the line.

1 a c _ _ _ _ _
2 h _ _ _ _ _
3 _ _ _ _ _
4 h _ _ _ _ _

2 Write. Listen. Write. Listen. Write. Listen. Write.

The clown has flowers, Red and blue, He has a round nose, But only one shoe. He has orange hair, He's in his house. He jumps on a chair, He's scared of a mouse!

3 Write.

1 The clown has a round nose.
2 He has orange hair.
3 He is in his house.
4 He jumps on a chair.
5 He's scared of a mouse.

Online Practice allows children to practice phonics in a different context.

Lesson Five Skills Time! Words and Reading

Lessons 5 and 6 provide a focused study of skills. Lesson 5 teaches a further vocabulary set which is then practiced through a reading text. It also concentrates on reading comprehension, looking at a variety of text types.

The children read and listen to the text for the first time.

The children listen and point to the pictures. They then listen again and repeat the words. This is reinforced with flashcard activities.

The children look at the reading text and illustrations. They identify key words and features in the text as preparation for reading.

The children read the text again, this time looking for details that will enable them to complete the comprehension activity.

Skills Time!
Lesson Five

Reading

- 1 Listen, point, and repeat.
- 2 Look at the text. Where can you see the movie?
- 3 Listen and read.
- 4 Read again and answer the questions.

Monsters University
Monsters University is a comedy movie by Pixar, and now you can watch it on DVD!

The characters in Monsters University are funny monsters. They're 3D computer animations, but real actors play their voices.

In the movie, Mike is a six-year-old monster. He lives in the monster world. One day, he visits a company called Monsters Inc. Lots of monsters work there. The monsters visit the human world at night. They scare children and they use the children's screams to make energy! Mike wants to be a scary monster when he grows up. When Mike is a teenager, he goes to Monsters University to learn how to be scary. He meets Sulley, but they are not friends at first. Sulley is very good at scaring people, but Mike is not very scary at all. One day, Mike and Sulley go to the human world and they can't get back. They work together, and finally go home to the monster world. Now Mike and Sulley are friends. They get jobs at Monsters Inc., and they have fun working together!

Monsters University is very funny, and the actors' voices are fantastic. There's lots of cool music in the film, too. I love the song "Monsters University." The monsters are terrible singers, but the song is great!

Monsters University is lots of fun. Don't miss it!
Carl, aged 9

1 Do the monsters work in a theater? Yes No
2 Does Mike want to be scary? Yes No
3 Can you see actors in the movie? Yes No
4 Are the monsters good singers? Yes No
5 Do Mike and Sulley like working together in the end? Yes No
6 Is the movie funny? Yes No

Teaching reading

- Teach children a further vocabulary set. Play games using the flashcards to consolidate learning.
- Approach a new text in three stages: *pre-reading*, *reading for gist*, and *reading for detail*. Explain to the children that they do not have to understand every word to do this. By focusing on the language they do understand, it is possible to guess or use logic to work out the meaning of the rest.
- *Pre-reading (Exercise 2)*: This stage is about looking for clues to help the children piece together the meaning of the text. This includes looking at the pictures and text style to guess what type of text it is and what it is likely to be about. Ask the children to give suggestions about what they think the text will say before they start to read.
- *Reading for gist (Exercise 3)*: Play the recording twice while the children follow the text in their books. They do not need to be able to read every word independently, but they should be able to read carefully enough to understand the gist. Ask some simple comprehension questions to ensure they have understood the general points.
- *Reading for detail (Exercise 4)*: Go through the comprehension activity with the class so that the children know what information to look for in the text. Give them time to read the text again to find the answers. Have a class feedback session.

Workbook

The children practice the new vocabulary and complete comprehension activities on the reading text (they will usually need to look back at the reading text in their Student Books).

Skills Time!
Lesson Five

Lesson Six Skills Time! Listening, Speaking, and Writing (Student Book)

Lesson 6 focuses first on listening comprehension, and then on speaking and writing skills in the Student Book. The writing section is developed further in the corresponding Workbook page.

The children listen to a recording and complete a listening comprehension activity.

The children practice speaking in pairs, using a context that is similar to the reading and listening activities.

The children do exercises to develop their writing skills. Each unit develops a different aspect of their writing. Their writing is then developed in the Workbook in personalized writing activities.

Teaching listening, speaking, and writing

Listening

- *Pre-listening:* Ask the children to look at the pictures in the activity and to guess what the recording will be about. Elicit as many relevant words as possible.
- *Listening for gist:* Play the recording all the way through. The children listen and point to the pictures in their books.
- *Listening for detail:* Play the recording, pausing for children to complete the activity in their books.

Speaking

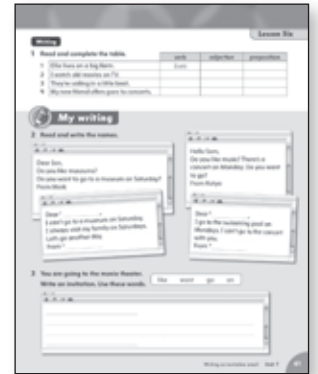

- The speaking task aims to develop speech that is clear and fluent.
- Call a volunteer to come to the front and demonstrate how to ask and answer the questions using the dialogue in the speech bubbles. Use different examples from the vocabulary set.
- Ask the children to repeat chorally, emphasizing correct intonation in the questions and answers. Check that the words are flowing together, without unnecessary pauses.
- The children then carry out the speaking activity in pairs. Move around the class while they are speaking and give models where necessary on how they can make their speech sound more fluent.

Writing

- Demonstrate the new writing skill by writing one or more example sentences from the Student Book on the board. Circle or underline the target punctuation or word.
- Encourage the children to find examples of the writing skill in the reading text in Lesson 5 or the story in Lesson 1.

Workbook

- The children now move from recognizing the new writing skill to producing it.
- Ensure that the children understand what type of sentences they need to produce in the writing task. Read the model text(s) aloud and elicit further examples from the class. Write them on the board.
- When the children have finished, call volunteers to come to the front to read their texts to the class.

Online Practice allows children to complete Listening, Speaking, and Writing exercises.

Fluency Time! Everyday English

The Fluency Time! lessons come after every three units and focus on developing fluency. The Everyday English lesson provides practice of new language used in functional situations through listening and speaking.

The children read and watch the story for the first time. The key Everyday English phrases are highlighted in the text to focus attention on the phrases. The children watch again, repeating the dialogues with the recording.

The children read the sentences, to help them understand the context, before they watch the video and complete the comprehension activity.

The children practice speaking in pairs, using the Everyday English phrases, in a context that is similar to the reading and listening activities above.

Fluency Time! 3 Watch

Everyday English

1 Watch and listen. Read and say.

2 Watch and listen. Circle the correct words.

- Play the video for children to listen and follow the dialogue in their Student Books.
- Play the video again, pausing if necessary, for children to say the dialogue along with the recording.
- Children practice the dialogue in pairs or groups.
- Ask groups of children to act out the dialogue for the class.

Comprehension

- Show the children the sentences and explain that they need to watch the video and circle the correct words.
- The recording contains examples of the Everyday English phrases, and some additional “passive” phrases, which simply set the context. Remind the children that they don’t need to understand every word.
- Play the video, pausing after each item for children to circle the words.
- Ask children to read out the correct sentences.

Speaking

- Ask children to work in pairs.
- Show children the words in the box, and ask them to mime the different words to show understanding.
- Ask two children to read out the example dialogue.
- In pairs, children read the example dialogue, then choose prompts from the box to make new dialogues.
- Monitor children’s performance. Ask some pairs to act out their dialogues in front of the class.

Workbook

- The children practice reading and writing the Everyday English phrases in a new context.

Fluency Time! 3 Watch

Children do exercises to practice the Everyday English phrases in the Online Practice Fluency section.

Fluency Time! Craft

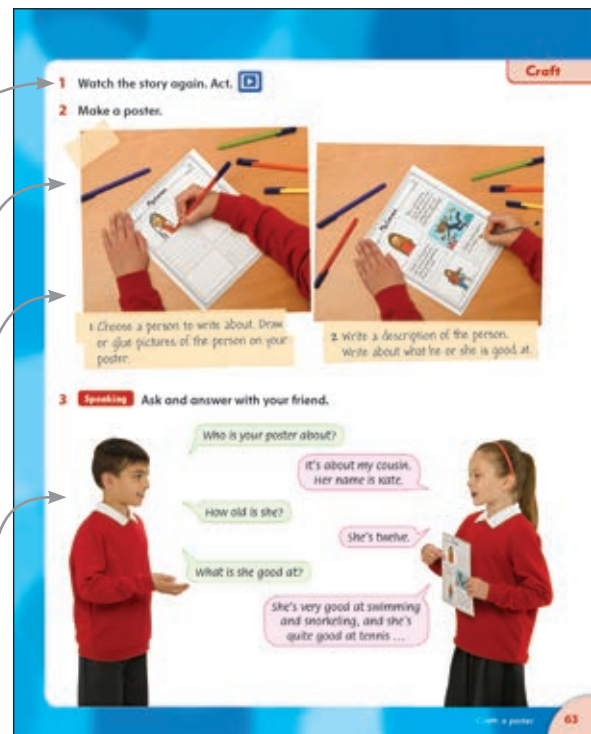

The Craft lesson provides further and more extended speaking practice of the new language, by making and using a craft activity which is linked directly to the Fluency Time! topic.

The children watch the story from the Everyday English lesson, or listen on the Class CD. They then produce the language by acting out the story.

The children look at the photos, and follow the instructions to prepare their craft activity.

There are templates for each Fluency Craft in the Teacher's Resource Center.

The children produce the language in a freer speaking activity. In pairs children use the completed craft project to practice Everyday English phrases in a more personalized dialogue. They are encouraged to include additional words or structures that they remember from previous units.

Teaching crafts

Acting out the Story

- Draw children's attention to the story in Exercise 1 of the Everyday English lesson on the previous page of the Student Book. Ask the children what they can remember.
- Play the Fluency DVD, Fluency Time! scene 1 again. If you don't have time for the DVD, read the story.
- Ask groups of children to act out the dialogue (or their own variations of the dialogue).
- Play Fluency DVD, Fluency Time! scene 2 again for children to watch and listen.

Craft

- Focus on the pictures. Ask children to say what they think the child in the pictures is doing (*drawing and writing about a person*).
- Ask *What do you need to make the poster?* to elicit *colored pens and pencils*.
- Give each child a copy of the template (see Fluency Project 3, Teacher's Resource Center). Give each group colored pens and pencils.
- Use the pictures and instructions to talk children through the process of making their posters. Move around the class as children work, asking questions, e.g. *Who's this? Where's the ...?*

Speaking

- Focus on the photo. Tell children they are going to use their posters to make dialogues.
- Ask two children to read out the example dialogue.
- The children talk in pairs, taking turns to ask questions about their partner's poster, as in the example.
- Ask some pairs to act out their dialogues in front of the class.
- Ask individual children to tell the class about their poster.

Workbook

The children watch the Fluency DVD again and complete the comprehension activities on the DVD practice page.

As their level increases, children can use Online Practice to write about their crafts.

Science Time! Topic

The subject lessons come after every three units and focus on developing teaching content through English. The Topic lesson introduces new language related to the subject and provides reading and speaking practice.

The children listen and point to the pictures. They then listen again and repeat the words. This is reinforced with flashcard activities.

The children read and listen to the text for the first time.

The children answer questions related to the topic. These questions invite them to personalize the information they have learned in the text.

Science Time!

Food Groups

Grains
Foods made from wheat, rice, or other cereal grains are grain foods. Some examples are bread, pasta, and breakfast cereals. Grains give us energy so that we can be active all day.

Dairy
Milk, yogurt, cheese, cream, and butter are dairy foods. Dairy foods help to keep your bones and teeth strong.

Meat and fish
Meat, fish, and seafood help you to build healthy bones, muscles, skin, and blood. Other foods can do this, too. If you don't eat meat, you need lots of beans and peas, eggs, nuts, and seeds.

Fruit and vegetables
Fruit and vegetables keep your body healthy and stop you from getting ill. They give you lots of vitamins to help your body grow and repair itself.

3 Check Write the foods in the correct columns. Add one more food to each column.

butter lemon bread hamburgers potato
cucumber melon chicken pasta cheese

LLAMAS

Farmers keep different animals for different uses. They keep sheep for their wool and meat, and they keep cows for their milk and meat. They keep pigs and turkeys for their meat, and they keep chickens for their eggs. But some farmers keep more unusual animals, too.

Llamas are becoming popular farm animals these days because they are friendly animals and they are very useful. Llamas have long legs, long necks, and small heads. They have wool coats. People can use llama wool to make clothes and blankets. Llamas can also carry things, and they make very good guard animals. Llamas protect groups of other animals, like sheep or pigs. Llamas eat grass, just like sheep and cows. They like people and other animals, so they are great animals to have on a farm.

3 Think! Complete the Venn diagram. Can you add any more facts to the diagram?

have wool eat grass have long necks
protect other animals have short necks have short legs

Critical Thinking

- Ask children to name all the animals they know. Write the words on the board. Ask children to say where you can find / keep each animal (*at home, on a farm, in a zoo, etc.*).

Lead-in

- Hold up flashcards 88–93 and say the words for children to repeat.
- Hold up the flashcards, one at a time, and ask *Is it a (pig)?* Children answer *Yes, or No, it's a (sheep).*

1 Listen, point, and repeat. 55

- Ask children to look at the pictures. Play the first part of the recording for children to listen and point to the pictures.

- Play the second part for children to repeat.
- Play the recording all the way through again for children to listen and point and then repeat the words.
- Stick flashcards 88–93 on the board. Tell children to close their eyes. Remove one of the flashcards. Tell children to open their eyes and say which flashcard is missing.

2 Listen and read. 56

- Play the recording for children to listen and follow the text in their Student Books.
- Play the recording again. Ask comprehension questions, e.g. *Why do farmers keep (sheep)? What do llamas look like? What can llamas do?*
- Ask children to say what their favorite farm animal is and why they like it.

3 Think! Complete the Venn diagram. Can you add any more facts to the diagram?

Critical Thinking

- Ask *Do sheep have wool?* Elicit the answer *Yes*. Ask *Do llamas have wool?* Elicit the answer *Yes*. Show children how *have wool* has been written in the middle section of the diagram, because it is true for both animals.
- Complete the next item together and check understanding.

Collaboration

- Put children in pairs to complete the diagram. Monitor the activity, helping children as necessary.

Differentiation

Below level:

- Divide the class into groups of four. Divide the children in each group into two pairs. Tell one pair that they are sheep and tell the other pair that they are llamas.
- Tell the children to look at the phrases in the box and decide which is true for their animal. Tell them to copy each of the true phrases onto a piece of paper.
- The pairs then come back together in a group and compare their pieces of paper. Tell the groups to place the phrases which both the sheep and the llamas have on the table between them, and to place the phrases for the sheep on one side and the phrase for the llamas on the other side to make a Venn diagram.

At level:

- Children complete the activity.

Above level:

- Have children work in pairs to complete the diagram, then use the Internet or reference books to find out more facts about sheep and llamas to add to their diagram.

- Have the children sit back-to-back with their partner. Tell the "As" that they will say and spell the "across" words and the "Bs" that they will say and spell the "down" words in order to check their answers.

Differentiation

Below level:

- For Exercise 1, write the crossword words on the board (not in the correct order) so that children are supported by having a small choice of words, with the correct spelling to help them.
- For Exercise 2, do two or three of the gaps as a class, eliciting the answers from the more confident students before having children complete the rest of the exercise individually.
- For Exercise 3, point to the picture before children begin and elicit the different things they can see in the picture.

At level:

- For Exercise 5, do two or three of the gaps as a class, eliciting the answers from the more confident students before having children complete the rest of the exercise individually.
- Focus on the different spelling of the same sounds before beginning Exercise 6. Review the sounds and spelling of *aw*, *oi*, *oy*, *or*. Drill the sounds one by one.

At level:

- For Exercise 4 have children work in pairs to practice asking and answering the questions. Focus on intonation and expression.
- Put students into pairs when they have completed Exercise 5 and ask them to say the text again, making it true for themselves. They need to think about when they get up, how they go to school, and what they do after school.

Above level:

- After Exercise 4 divide the class into two. Tell one half that they will ask the questions and one half that they will say the answers.
- Tell all the children to stand up. They are going to walk around the classroom and talk to each other.
- The children asking the questions can take their Student Book and read the questions, in any order they like to different children from the other group. But all the questions have to be about the person they are talking to (not about Maria or Tom). For example, *Are you good at surfing?* The students answering the questions do not have their book.
- Tell the children answering the questions to answer them personally, not using the answers from the book, but real answers.
- Then swap the halves around and do the activity again.
- For Exercise 6, ask children to think of one more word for each vowel combination. They can look through the Student Book to help them find the correct words.

play theater concert actor movie singer

2 Look at the text. Where can you see the movie? 3 Listen and read. 🎧

Monsters University

Monsters University is a comedy movie by Pixar, and now you can watch it on DVD!

The characters in Monsters University are funny monsters. They're 3D computer animations, but real actors play their voices.

In the movie, Mike is a six-year-old monster. He lives in the monster world. One day, he visits a company called Monsters Inc. Lots of monsters work there. The monsters visit the human world at night. They scare children and they use the children's screams to make energy! Mike wants to be a scary monster when he grows up. When Mike is a teenager, he goes to Monsters University to learn how to be scary. He meets Sulley, but they are not friends at first. Sulley is very good at scaring people, but Mike is not very scary at all. One day, Mike and Sulley go to the human world and they can't get back. They work together, and finally go home to the monster world. Now Mike and Sulley are friends. They get jobs at Monsters Inc., and they have fun working together.

Monsters University is very funny, and the actors' voices are fantastic. There's lots of cool music in the film, too. I love the song "Monsters University." The monsters are terrible singers, but the song is great!

Monsters University is lots of fun. Don't miss it!

Carl, aged 9

4 Read again and answer the questions.

1 Do the monsters work in a theater? **No** 2 Does Mike want to be scary?

3 Can you see actors in the movie? 4 Are the monsters good singers?

- Focus on the pictures. Ask children to say what the child in the pictures is doing (*making a poster*).
- Ask *What do you need to make the poster?* Elicit *colored pencils, paper*.

- Divide the class into groups. Give each child a poster template (see Fluency Craft 3, Teacher's Resource Center). If children have brought photos or pictures, ask them to show the class and name the activities.
- Use the pictures and instructions to explain the process. Demonstrate with your own completed poster.
- Move around the class as children work, asking questions, e.g. *Who's this? What is he / she good at?*

NOTE: If you don't have time, ask children to draw their posters on paper. Alternatively, children can work in groups and draw pictures / write sentences, then glue their pictures onto poster board, and present their posters to the class.

Differentiation

Below level:

- Have children write words and phrases about the person in their poster. Then work with children to make sentences aloud together.

At level:

- Children complete the activity.

Above level:

- Children swap posters and tell the class about the poster they have been given. Encourage the rest of the class to ask questions about the person on the poster, e.g. *Who is he / she? How old is he / she? What is he / she good at?*

3 Ask and answer with your friend.

- Focus on the photo. Tell the children they are going to use their posters to act out dialogues in pairs.
- Ask two children to read the example.
- Then children talk in pairs, taking turns to ask questions about their partner's poster.
- Encourage children to add language, e.g. *Where does he / she live? Does he / she like...?*
- Invite children to act out their dialogues for the class.

Food Groups

Grains
Foods made from wheat, rice, or other cereal grains are grain foods. Some examples are bread, pasta, and breakfast cereals. Grains give us energy so that we can be active all day.

Dairy
Milk, yogurt, cheese, cream, and butter are dairy foods. Dairy foods help to keep your bones and teeth strong.

Meat and fish
Meat, fish, and seafood help you to build healthy bones, muscles, skin, and blood. Other foods can do this, too. If you don't eat meat, you need lots of beans and peas, eggs, nuts, and seeds.

Fruit and vegetables
Fruit and vegetables keep your body healthy and stop you from getting ill. They give you lots of vitamins to help your body grow and repair itself.

3 Think! Write the foods in the correct columns. Add one more food to each column.

- Have children work in groups of five. Assign each child a food group. Children then cut out pictures for their food group and glue them onto the correct section of the pyramid.

At level:

3 Present your project.

Communication

- Put children into groups of three or four. Tell them that they are now going to talk about their project with each other.
- Demonstrate by either holding up a completed food pyramid, or using the example in the Student Book. Hold up the food pyramid and talk about the different food groups, as in the example. Point to the pictures as you mention them.
- Children talk in groups. Encourage children to include language from previous units as they talk about their projects (e.g. *Cereal is a grain food. I have cereal with milk for breakfast every morning. Milk is a dairy food.*).

- Children talk in pairs, taking turns to ask questions about their partner's island, as in the example.
- Encourage children to add language to their dialogues, e.g. *What's next to the (café)? Is the movie theater near the beach?*
- Invite some pairs to act out their dialogues for the class.

Differentiation

Below level:

- Simplify the "at level" game. Tell one student to pick a place on the map but don't say where. He / She uses *left*, *right*, and *straight* to give directions. When they arrive, switch roles. Monitor and help as needed.

At level:

- Play a game in pairs. Children choose a starting place for their partner, e.g. *You're at the café*, then direct him / her to another place without saying the destination, e.g. *Turn left. Now go straight*. When their partner reaches the destination, the first child asks *Where are you?* Their partner answers *I'm at the (beach!)*. Children swap roles and play again.

Above level:

- Extend the "at level" activity by planning a fun day on the island. In pairs, children choose three places to visit, and give directions from one place to the next. Encourage them to use *first*, *next*, *then*, and *finally*.

2 Look at the text. How did the Wampanoag people help the English people?

3 Listen and read. 🎧

THE FIRST THANKSGIVING

Every fall, Americans eat a big Thanksgiving dinner with their families, but when was the first Thanksgiving?

A long time ago, there were many Native American people in North America. Some of these people were the Wampanoag. They were farmers, fishermen, and hunters. Their home was along the east coast of America, between Massachusetts and Rhode Island.

In the 17th Century, there were lots of people from Europe in America. They were the European settlers. Some of the settlers were from England.

The English people's home was at the top of a hill, in the middle of a large area of land. The English weren't very good at farming, so when it was winter, there wasn't any food. The English were hungry and scared. The Wampanoag people were kind to the English. With the Wampanoag help, the English were soon good at fishing and farming.

The next year, there was lots of food for everyone and the English asked the Wampanoag to eat with them. This was the first Thanksgiving.

4 Read again and complete the sentences.

1 The Wampanoag people's home was on the east **coast** of America.

2 The English people's home was at the top of a **hill**.

3 When it was winter, there wasn't any **food**.

4 The next year, the English asked the Wampanoag to **eat** with them.

Writing preparation

We use paragraphs to make a text easier to read. We start a new paragraph for each separate topic in a text.

Paragraph 1 = Who were the settlers?
There were lots of European settlers in 17th Century America. The settlers were from lots of different countries. There were Spanish, Dutch, English, and French settlers.

Paragraph 2 = What was life like for the settlers?
At first, life in America was very difficult for the settlers. The houses were very small. There were new plants and new animals to learn about. There was lots of work to do.

Complete the writing task on page 93 of the Workbook.

3 Look at the text on page 92. How many paragraphs can you find?

Topic: Transportation

1 Listen, point, and repeat. 111

2 Listen and Read. 114

PLANES ARE BIG AND HEAVY. SO HOW DO THEY FLY?

Shape
Air helps a plane to fly. A plane must be the right shape for the air to move around it. The plane's body, wings, and tail help the air to move around the plane in the right way.

Engine
The plane's engine gives it the power to take off and fly. The engine burns fuel. This makes heat. The heat pushes gases out of the back of the plane, which makes the plane move forward.

Materials
We use special metals and plastics to build planes. These materials are very strong and very light. They help the plane to fly quickly and safely.

Controls
The pilot uses lots of controls to fly the plane higher or lower, and faster or slower. The controls are in the cockpit of the plane and the pilot sits here.

2 Look at the text below. Who made hammocks?

3 Listen and read. **ns**

Hammocks

Thousands of years ago, the Mayans used the bark from hammock trees to make a special kind of bed. These beds were hammocks. People used them to sit on or to sleep in. They were light and easy to carry. The Mayans often moved from place to place, and they didn't want to carry heavy things. The Mayans lived in rainforests. The weather was hot and there were lots of bugs, so it was difficult to sleep. Hammocks were perfect beds for the Mayans, because they weren't on the ground.

At first, only people in hot countries had hammocks, but then a man called Christopher Columbus took hammocks to Europe. Soon, sailors on ships started to sleep in hammocks, because they were soft and comfortable.

Today, Mayan people in Central America still make hammocks, and people all over the world buy them to use in their back yards or homes.

Craft SB page 111

Learning outcomes

- To make a party scene
- To describe people in a party scene

Language

Who's...?; What's he / she like?; She looks...; She's (quite)...

Materials

Fluency DVD Fluency Time! 5 (optional); Fluency Craft 5 (Teacher's Resource Center) (one set of templates 1 & 2 for each child); completed party scene; colored pencils / markers / crayons, scissors, and glue for each group of children

1 Watch the story again. Act.

- Draw children's attention to the story in Exercise 1 on page 110. Ask children what they remember.
- Play the Fluency DVD Fluency Time! 5 scenes 1–3. If you don't have time for the DVD, read the dialogue on page 110.
- Invite pairs of children to act out the dialogue. Encourage them to change details to make their own variations.

2 Make a party scene.

- Focus on the pictures. Ask children to say what the child in the pictures is doing (*making a party scene with different people in it*).

- Ask *What do you need to make the party scene?* to elicit *colored pencils, scissors, glue*.
- Divide the class into groups. Give each child copies of the templates (see Fluency Craft 5, Teacher's Resource Center). Give each group colored pencils, scissors, and glue.
- Use the pictures and instructions to explain how to make the party scene. Demonstrate with your own completed scene. Make sure children understand what to do.
- Move around the class as children work, asking questions, e.g. *Who's this? What's his name? What's she like?*

NOTE: If you don't have time to use photocopies, ask children to draw a party scene on paper, giving different facial expressions to each of the people in the scene and writing the people's names on the back of the paper (behind each person).

3 Ask and answer with your friend.

- Focus on the photo. Tell children to use their party scenes to act out dialogues in pairs.
- Ask two children to read the example dialogue.
- Children can then act out dialogues in pairs, taking turns to ask about the people in their partner's scene.
- Children can swap partners to act out new dialogues.
- Invite some pairs to act out for the class.

Differentiation

Below level:

- Have children write the adjectives from pages 96 and 110 on slips on paper. In pairs, children look at their party scenes. Children try to do a simple ask and answer, e.g. *What's (Steve) like? / He's (tall) and (kind)*. Use the papers for support. If making full sentences is hard, children can simply point to the adjectives. Monitor and help as needed.

At level:

- Children complete the activity.

Above level:

- After children finish, ask children to write a few sentences about their party scene. Ask *Why is there a party? What happened?* If time permits, children can share with the class.

School Camping Trip

Last month, twenty students from 6th grade were on the school camping trip. TOM WALTERS tells us all about it.

Where did you stay?
We stayed in tents near a river. It was fun!

Did you have classes?
No, we didn't, but we fished every day and we learned how to make a bridge over the river, too. We used rope and wood.

Was it cold at night?
No, it wasn't. We had warm sleeping bags. It was very dark, but we had flashlights. One night, there was a noise outside. We were scared, but when we looked outside, there was only a cat.

What did you eat?
We cooked food in frying pans on a fire. Sometimes we cooked the fish from the river! One day, it rained and our matches were wet. So we started a fire with two sticks!

4 Read again and answer the questions.

1 Did the children stay in tents? **Yes.** 2 Did the children use rope to make a bridge? _____

3 Did the children stay near a beach? _____ 4 Did the children cook in a kitchen? _____

5 Did the children have classes? _____ 6 Did it rain? _____

What is art?

Artists make **drawings** by using a pencil or charcoal to draw a picture on a piece of paper or another smooth surface.

Artists make **paintings** by using a paintbrush to paint on a piece of paper, canvas, or other material.

Photographers make **photographs** with cameras. Photographers like to use light and shadow to make their photographs more interesting.

Artists make **collages** by gluing or taping different materials onto a surface to make a picture or pattern. You can use lots of interesting material to make a collage, such as plastic, fabric, metal, or shells.

Sculptors make **sculptures** by carving wood or stone, or by shaping clay. Some sculptors also make sculptures by joining metal, wire, or other materials together to make a shape or figure.

3 Think! What do you need to make each piece of art? Write the words under the correct headings. Add one more word to each column.
