Introduction

Introducing *Got it! 2nd edition*

Methodology

Got it! 2nd edition is a four-level American English course written specifically for secondary school students, with particular emphasis on meaningful communication and skills development. It covers levels A1 through B2 in the Common European Framework for Reference (CEFR).

The second edition has brand new content and builds on the strengths of the first edition, following thorough research into the needs of teachers and students.

Key features of the methodology are:

Hands-on language presentation Students immediately interact with the dialogue or text that opens each unit, check their understanding of meaning and context, and are given the chance to try out new structures;

Guided discovery Students explore the meaning and usage of new language before they move on to more formal presentation and practice;

Communicative practice Dialogue work and personalization are emphasized at each level, and pairwork activities and games are included throughout;

Cultural awareness A focus on the U.S. and other English-speaking countries is placed within the context of the wider world;

Skills development In every unit, students apply and extend what they have learned, through targeted skills lessons designed to build their competence in each individual skill;

Self-assessment Students regularly review and measure their progress against the Common European Framework of Reference;

Learning across the curriculum Interdisciplinary reading and project pages link the topics and language content of the main units to other areas of the school curriculum;

Values The topics in *Got it! 2nd edition* have been carefully chosen to stimulate reflection on a broad range of issues related to citizenship and the development of socially responsible values. These are highlighted in the teaching notes for each unit.

Using the Student Book

Welcome unit

The Welcome unit offers six pages of vocabulary and grammar practice, covering language students have seen in the previous level. In the Starter level, students are given a brief overview of basic language they may have seen at primary level, before beginning the main syllabus in unit 1.

Main units

Each main unit is divided as follows:

Presentation and Language focus 2 pages

Vocabulary 1 page

Grammar 1 page

Communication 1 page

Grammar 1 page

Skills 2 pages

Presentation

The Presentation text on the left-hand page exposes students to the theme, grammar, vocabulary, and functions of the unit. The Language focus exercises on the right-hand page allow students to interact with the dialogue in more detail, encouraging them to explore, use, and personalize new language before it is formally presented and practiced on the Vocabulary and Grammar pages.

In the Starter level and Level 1, the text is a dialogue presented in a photostory format. The photostories reflect the aspirations of the students, using familiar contexts to motivate and engage them. Each unit focuses on a different episode in the lives of the central characters.

In the Starter level, the story takes place in a school. Jacob meets a new girl, Lucia. Lucia joins the school choir, and Jacob joins the choir so he can get to know her. Jacob's friends are mad about this because choir practice makes him late for soccer practice. Max tells Jacob to choose between choir and soccer. Jacob is sad and chooses choir, which means he will

miss the big soccer game. Lucia persuades Jacob at the last minute to play in the game. Jacob's friends go to watch the choir perform in a show, and realise that choir is actually cool.

In Level 1, we follow a story about two bands (Supernova and The Misfitz) competing against each other in a Battle of the Bands competition. Zac, the lead singer of Supernova, is behaving arrogantly and doesn't care about band practice. The other members of the band become frustrated with him. Zac decides to leave Supernova and join The Misfitz. This leaves Supernova without a singer at the last minute. Rosie, a member of Supernova, decides to sing at the contest, transforms her image, and amazes everybody! Supernova wins the contest. Zac is mad, but the Supernova band members are very happy.

In Levels 2 and 3, the emphasis is on texts dealing with individual topics of a more grown-up nature, in recognition of the fact that students, along with their interests and tastes, mature very quickly during the teenage years. A variety of formats and genres is used, including dialogues, magazine articles, and web pages.

Following on from the presentation text, students complete a series of questions to check basic comprehension. The **Check it out!** feature draws students' attention to useful colloquial expressions in the dialogue in Starter level and Level 1, while in Levels 2 and 3 it helps students extend their vocabulary.

Language focus

The exercises in the Language focus section familiarize students with the language of the unit, without requiring them to manipulate it. In Starter and Level 1, students focus on the target language in relation to specific scenes and sections of dialogue from the photostory; in Levels 2 and 3, students find phrases and structures in the presentation text, and use them to complete sentences or captions about the text.

Finally, **Focus on you** and **Pairwork** activities give students the chance to communicate with the new language in a personalized context, following carefully controlled models.

Vocabulary

This page presents and practices a set of vocabulary items associated with the unit topic and previewed in the presentation lesson. **Look!** boxes contain useful tips and draw attention to potential problems and errors. These include spelling rules, exceptions or irregular forms, collocations, and notes about English usage.

Students once again have the opportunity for guided speaking practice with a **Pairwork** activity at the end of the lesson.

At the foot of the Vocabulary page, students are directed to the Extra practice online and the Workbook, where there is further practice of the unit vocabulary.

Grammar

Underlying the methodology of *Got it!* is the conviction that students understand and remember rules better if they work them out for themselves. As a result, a guided discovery approach to teaching grammar is adopted throughout the series.

Each unit has two Grammar lessons. A grammar chart models the form of the key structures, using examples taken from the presentation text that opens the unit.

Having already experimented with the new structures earlier in the unit, students are encouraged to reflect on correct usage in more detail as they complete the **Think!** activity.

A cross-reference to **Rules** then directs the students to a grammar reference page in the corresponding Workbook unit, where detailed explanations and examples are given.

The activities on the page provide thorough and detailed practice of both form and usage, moving from carefully controlled exercises to more demanding production.

Each Grammar page has an optional **Finished?** activity. These are designed as a fun way of providing extension work for fast finishers. Fast finishers can then move on to a puzzle at the back of the book. The puzzle practices the language presented in the unit.

At the end of each Grammar page, students are directed to the Extra practice online and the Workbook, where there is further practice.

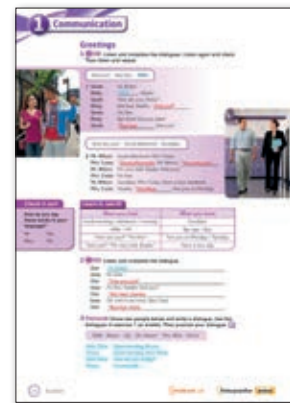

Communication

One page in every unit focuses on everyday English. Conversational language is presented in the form of a dialogue which reviews the vocabulary and grammar from the previous lessons.

The **Learn it, use it!** feature summarizes the target language in the dialogue, while some pages feature a **Pronunciation** activity that draws students' attention to a specific sound or a relevant aspect of intonation. The students then listen to this language in different contexts before practicing it themselves in the **Pairwork** activity.

At the end of each Communication page, students are directed to the Extra practice online and the Workbook, where there is further practice.

Skills

The last two pages of the unit contain targeted skills work designed to equip students with the necessary strategies to build confidence and competence in each individual skill.

Skills lessons also provide a way of consolidating and recycling the language students have studied throughout the unit, while exploring different aspects of the unit topic.

Reading texts deal with the main topic of the unit in a factual way using real-life contexts. Comprehension exercises typically start with a skimming or scanning activity, followed by more detailed questions that gradually increase in difficulty as the series progresses.

Listening activities extend the topic of the text. A variety of activity formats is used to help students develop well-rounded listening comprehension skills.

The **Speaking** and **Writing** sections give students the opportunity to respond to the unit topic with their own ideas. To help students organize their ideas, both sections usually begin with a written preparation stage. The aim is to strike a

balance between giving clear, guided models on the page on the one hand, and allowing students freedom to express themselves and experiment with newly-acquired vocabulary and structures on the other.

Review units

After every two main units, there is a four-page Review unit comprising:

Grammar and Vocabulary Review 1 page

Extra communication 1 page

Culture club reading 1 page

My progress 1 page

The first page of each Review unit covers the main grammar and vocabulary points from the previous two units. The second page of the Review unit consists of **Extra communication** activities. This comprises practice from the Communication sections of the previous two units, some relevant Pronunciation work, and an additional listening comprehension.

Most teenagers are curious to know what life is like for their peers in other parts of the world. **Culture club** reading lessons give a factual account of different aspects of the English-speaking world from a young person's perspective. The **Presentation** section at the end of the lesson invites a personal response from students in the form of a presentation.

The **My progress** page is a self-assessment page correlated to the Common European Framework of Reference. It is very motivating for students to reflect on their progress, and this type of activity is also very helpful in encouraging students to take responsibility for their own learning.

Remember

After Unit 4, there is a two-page review covering the main grammar and vocabulary points from the first half of the book. In the split edition of *Got it! 2nd edition*, the Remember unit opens the second volume at each level.

Writing builder

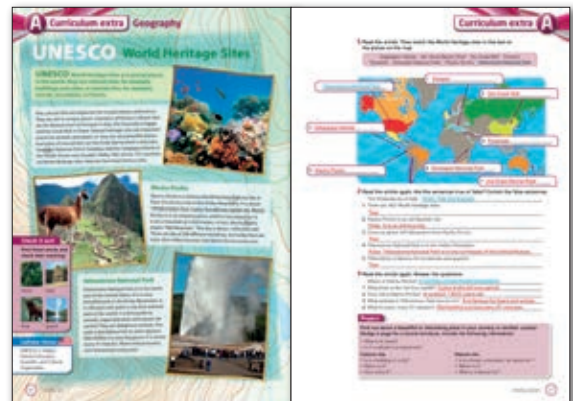

There are four Writing builder pages in the Student Book, providing extra writing practice for every main unit. The Writing builder gives an opportunity to expand and develop the skills acquired in the writing section in the unit. In each section, a useful skill or language point is presented and then practiced. Students work with a model text and build up to producing their own composition, with the support of a Writing guide.

Curriculum extra

There are four cross-curricular reading and project lessons in the Student Book, providing two pages of material for each block of two units. The Curriculum extra lessons link to the themes of the corresponding Student Book units, as well as to subjects that students typically study in their own language, such as geography, science, math, art, and history.

Each of the lessons concludes with a project that synthesizes the language focus and the content of the cross-curricular theme and gives students the opportunity to develop their creativity. The projects can be done in class or assigned for homework. Depending on time available and the needs of the students, the projects can be done in groups, pairs, or individually.

Puzzles

There are four Puzzle pages in the Student Book, providing two puzzles for every main unit. These puzzles practice the key vocabulary and grammar that is presented in the unit. Students are directed toward the puzzles when they have completed all the activities on the grammar pages. The puzzles are useful for mixed-ability classes as they make a good activity for fast finishers, as well as being motivating for weaker students. Alternatively, they can be used with the whole class as a fun warm-up or end-of-lesson activity.

Word list

The Student Book includes a Word list clearly organized by unit and by part of speech. It contains all sets of new vocabulary items from each of the eight units in addition to other incidental vocabulary items that may be new to students.

All words are accompanied by their pronunciation clearly presented in phonetics, and the Word list is a useful tool for student self-study.

Workbook

The Workbook section contains eight six-page units of extra practice of the language and skills taught in the Student Book. The Workbook exercises can be completed in class or for homework.

The first two pages of each Workbook unit summarize the grammar structures introduced in the corresponding Student Book unit with comprehensive charts and detailed grammar notes. They also contain a Word list of all the new vocabulary from that unit.

The following two pages provide extra vocabulary and grammar practice.

The last two pages provide additional practice to accompany the Student Book Communication lesson, and further reading and writing practice.

Online Workbook

All students have access to the Online Workbook, via a code supplied on a card in the Student Book and Workbook.

The Online Workbook includes activities from the print Workbook, with additional **Extra practice** in vocabulary, grammar, and communication. There are extra activities for every unit of the Student Book, as well as a **Picture dictionary**, extra **Review activities**, and regular interactive **Progress quizzes**.

Most of the Online Workbook and Extra Practice activities are automatically graded, and the scores are visible in the **Gradebook**. You can assign work to your students and monitor their progress.

You can access the Online Workbook Learning Management System via a code supplied on a card in the Teacher's Book. The Teacher's resources are also supplied online in the Teacher's resources section of the Online Workbook.

There are many benefits to using these online materials. Students often feel more motivated when working online, and the automatic grading means that valuable time in class does not have to be spent correcting homework.

The Online Workbook and Extra practice activities are suitable for use in a language lab with Internet connection if there is one computer per student, as well as at home.

See page xv for more information and support with getting started.

The Online Workbook includes most of the exercises from the Workbook in an interactive format. Students and teachers can use all the content easily on desktop, laptop, or tablet computers.

Each unit of the Online Workbook contains a **Picture dictionary** with audio which students can listen to in order to review the vocabulary set from the corresponding Student Book unit.

The Online Workbook features automatic scoring of most exercises.

Writing exercises are provided in a PDF format which students can send electronically to their teachers for grading.

The Gradebook allows teachers to monitor students' progress in the Online Workbook and send feedback on their work. Teachers can choose to filter the data in a variety of different ways, and they also have the ability to generate reports.

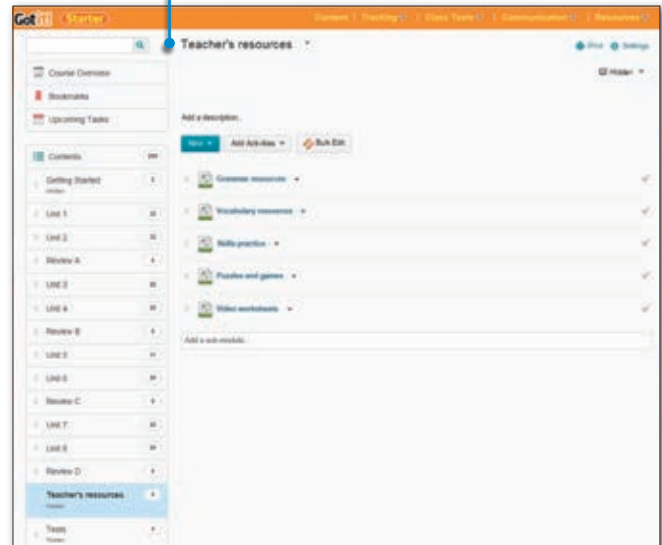

Online Teacher's resources

There is a large amount of extra resource material included online in the Teacher's resources section of the Online Workbook. These can be accessed via a code supplied on a card in the Teacher's Book.

The Teacher's resources provide support material for consolidation, extension, mixed-ability classes, and assessment.

All the printable Teacher's resources and tests are in one place and are easily accessible from the Teacher's view of the Online Workbook.

The Teacher's view of the Online workbook can only be accessed by teachers who have registered and been validated. Students cannot see or access the teacher's materials.

The **Unit tests** include vocabulary and grammar questions, dialogue work, and a writing task. Each test is scored out of 50 points.

The **Review tests** focus on vocabulary and grammar, and reading, writing, and listening skills. Each test is scored out of 100 points.

All course tests have A and B versions, to help prevent your students from cheating.

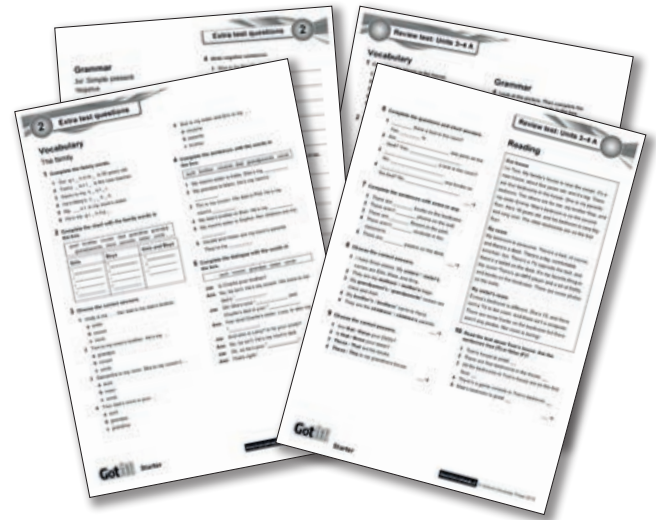

There is also a bank of **Extra test questions** in editable Microsoft® Word documents, with more grammar and vocabulary questions for every unit of the Student Book. You can use these to compile additional tests to suit your individual requirements.

Regular assessment makes it easier to monitor students' progress during each semester. Teachers can keep a record of individual students' progress using the evaluation chart on page xix.

There are also printable **practice examinations** in the style of KET, PET, and TOEFL Junior, aligned to the *Got it! 2nd edition* syllabus.

These will help students who are preparing for these exams to gain confidence with the specific question types while using language that they have already covered. The audio material for these practice examinations is available online with all the resources.

There is also a printable **KET practice test** with Level 2, and a printable **PET practice test** with Level 3. Further practice tests can be purchased from www.oxfordenglishtesting.com.

DVD

Two DVDs accompany the series, with four video reports for each level. The material deals with different cultural aspects of the English-speaking world, and is closely linked to the language syllabus and topical themes of the Student Book. There are also video voxpops – authentic interviews with American teenagers about the topics in the units of the book.

The video reports are designed to be used after completion of each Review unit, or after every second main unit.

The voxpops could be used at the end of each unit.

The DVD also contains printable worksheets, teaching notes, answer keys, and scripts. These can be accessed when the DVD is used with a computer.

In addition to the comprehension questions on the worksheets, there are multiple-choice questions displayed on screen after each documentary. The correct answer can be selected with the remote control if viewed on a DVD player, or using a mouse if viewed on a computer.

Class Audio CD

The Class Audio CD is for classroom use. There is a track list on page xxi.

Teacher's Book

The Teacher's Book contains detailed lesson notes and at-a-glance answers for all the Student Book and Workbook material.

Each Teacher's Book unit starts with a summary of the areas of vocabulary, grammar, communication, skills, and topical themes covered in the Student Book unit. Also listed are themes relating to values and responsible citizenship, such as:

- ethics and morals;
- society, including the themes of respect, solidarity, and justice;
- multiculturalism, including anthropology, human rights, cultural studies, sociology, and historical, geographical, legal, and ethical perspectives;

iTools

The *Got it! 2nd edition* iTools provides a powerful classroom resource for the teacher.

iTools contains the complete content of the Student Book and Workbook, designed to be projected in class. To take full advantage of its rich interactive content, it should be used with an interactive whiteboard, but may also be used with a computer connected to a screen or data projector.

In addition to the standard interactive functions common to interactive whiteboards, other features of iTools include:

- full audio content, launched directly from the Student Book page;
- audioscripts and answer keys displayed at the click of a button;
- interactive grammar presentations, which launch from the page, containing extra activities for each grammar point in the Student Book;
- video lessons with accompanying worksheets. There are four video reports per level, as well as authentic voxpop interviews with American teenagers for every unit. The video clips can be launched directly from the icon on the worksheet.

The notes include a description of the aim of every exercise in the Student Book, followed by detailed instructions and answers.

There are also suggestions for **Warm-up activities**, and **Extra activities** that can be used to extend the Student Book content according to the needs and abilities of each class.

The Student Book is full of factual information and references to the real world. The teaching notes provide support for this by giving additional notes and cultural facts in the **Background information** boxes.

Teenage students have an insatiable interest in music and popular culture, and the use of songs to consolidate the linguistic and topical contents of the Student Book can be an effective way of motivating students.

The teaching notes for each Review unit include suggestions for suitable songs that can be exploited for this purpose. The songs have been chosen because of their lexical, grammatical, or thematic link to the corresponding units.

See page xvi for suggestions on how to exploit songs in class.

Classroom management

An English-speaking environment

- Use English for classroom instructions as often as you can, and ask students to use English as well. For example: *Open your books at page 10. Raise your hand. Work in pairs, etc.*
- Students should be encouraged to use expressions such as: *How do you say ... in English? How do you spell ...? I don't understand. Please can you repeat that? Can you say that more slowly, please? Can I go to the bathroom?*

Managing large classes

Large classes are easier to manage if you establish routines such as:

- Write a plan of the day's activities on the board.
- Make sure that everyone understands the task before they start. Give clear examples and ask students to provide examples as well.
- Set time limits for all activities and remind them of time limits, for example: *You have two minutes left.*
- Walk around the class monitoring while students work.
- Get to know your students' personalities and learning styles so that you can maximize their potential in class.
- Allow stronger students to help weaker students while ensuring that there is always an atmosphere of mutual respect and understanding.

Group and pairwork

The interaction from working in small groups or in pairs is vital in a language classroom, and students quickly get used to what to expect. Here are some tips for organizing group work in large classes:

- Don't have more than five students per group.
- Set up group activities quickly by allocating students with a letter (A, B, C, etc.). Students form groups with other students who have the same letter.
- Demonstrate tasks with one pair or group at the front of the class.
- Set a time limit and keep reminding students of it.

Songs

There are many ways in which songs can be exploited in class, including the following suggestions:

- **Gap-fill** There are many variations of this type of activity, in which students are given the lyrics with certain key words deleted. To make it easier for students, the missing words can be grouped together in a wordpool. As students read the lyrics, they try to fill in the gaps, then they listen and check. If you wish to make the activity more challenging, you could add extra words to the wordpool as distracters, or not provide the missing words at all. It is important to choose the gapped words carefully, however, because they should be audible, and students should be able to guess from the context which word makes most sense in each gap.
- **Correct the mistakes** Include some incorrect words or information in the lyrics. Ask students to identify where the mistakes are and replace them with the correct words, before they listen to the song to check their answers.
- **Choose the correct alternative** At regular points in the lyrics, students have to choose between two or more alternative words or phrases to complete the lyrics correctly. Students then listen and check.

- **Put the verses in the correct order** This activity works especially well with songs that tell a story. Students are given the verses in the wrong order, and they have to guess the correct order before listening to the song.
- **Match rhyming words** Many songs are structured so that alternating lines end with rhyming words, and this provides an excellent opportunity to work on different sounds. One useful activity is to give students the lyrics with the lines of each verse jumbled. Students try to unjumble the lines, according to which lines rhyme with each other, before listening to the song to check their ideas. Another variation is for students to choose between two alternatives to end each line. This could mean choosing the word that provides the best rhyme, or the word that makes most sense in the context.
- **Match words to definitions** Songs often contain informal expressions, idioms, and colloquial grammar. With stronger groups, it can be useful to have students try to match difficult words and expressions to definitions or explanations. Alternatively, where lyrics feature more standard items of vocabulary, students could work together in groups to find the words in a dictionary and agree on a definition.

Feedback

It is important for students to have a sense of how they have performed. Provide feedback while you are monitoring activities. Alternatively, you can assess an exercise afterward with the whole class: students can put up their hands to indicate how many answers they shared, how hard or easy the task was, etc. Encourage students to behave well by using a points system. Award points to pairs or groups that don't make too much noise. Deduct points from pairs or groups that are too noisy or who are not speaking in English.

Common European Framework of Reference (CEFR)

The Common European Framework of Reference (CEFR) was designed to promote a consistent interpretation of foreign-language competence among the member states of the European Union. Today, the use of the CEFR has expanded beyond the boundaries of Europe, and it is used in other regions of the world, including Latin America, Asia, and the Middle East.

The CEFR defines linguistic competence in three levels: A, B, and C. Each of these levels is split into two sub-levels:

A	Basic User	A1	Breakthrough
		A2	Waystage
B	Independent User	B1	Threshold
		B2	Vantage
C	Proficient User	C1	Effectiveness
		C2	Mastery

The CEFR provides teachers with a structure for assessing their students' progress as well as monitoring specific language objectives and achievements. Students respond to the CEFR statements in the Reviews after Units 2, 4, 6, and 8.

Got it! aims to enable students to move from no English or level A1 into level B2 at the end of the four years of the course.

Descriptions of the CEFR levels

Basic User

- A1** Can understand and use familiar everyday expressions and very basic phrases aimed at the satisfaction of needs of a concrete type. Can introduce himself / herself and others and can ask and answer questions about personal details such as where he / she lives, people he / she knows, and things he / she has. Can interact in a simple way provided the other person talks slowly and clearly and is prepared to help.
- A2** Can understand sentences and frequently used expressions related to areas of most immediate relevance (e.g., very basic personal and family information, shopping, geography, employment). Can communicate in simple and routine tasks requiring a simple and direct exchange of information on familiar and routine matters. Can describe in simple terms aspect of his / her background, immediate environment, and matters in areas of immediate need.

Independent User

- B1** Can understand the main points of clear standard input on familiar matters regularly encountered in work, school, leisure, etc. Can deal with most situations likely to arise whilst traveling in an area where the language is spoken. Can produce simple connected text on topics which are familiar or of personal interest. Can describe experiences and events, dreams, hopes, and ambitions, and briefly give reasons and explanations for opinions and plans.
- B2** Can understand the main ideas of complex text on both concrete and abstract topics, including technical discussions in his / her field of specialization. Can interact with a degree of fluency and spontaneity that makes regular interaction with native speakers quite possible without strain for either party. Can produce clear, detailed text on a wide range of subjects and explain a viewpoint on a topical issue giving the advantages and disadvantages of various options.

English Portfolio

The **Language Portfolio** has been developed in conjunction with the CEFR. It is a folder kept by the students which details their experiences of English and learning English. A Language Portfolio consists of the following elements:

A Language Biography

- A checklist for students to assess their own language skills in terms of "What I can do." In *Got it!*, these are found in the Review Units after Units 2, 4, 6, and 8.
- Tools to help students identify their learning style and objectives. See the photocopiable form for students on page xviii.
- A checklist of learning activities outside the classroom. See the photocopiable form for students on page xviii.

A Language Passport

- An overview of the level attained by the student in English at the end of the year.

A Dossier

- Samples of the students' work, including tests, written work, projects, or other student-generated materials. In order to assist students with the compilation of a Language Portfolio, you may ask them to record their answers to the CEFR checklist on a separate sheet of paper and keep it in a folder. In addition, provide each student with a copy of the photocopiable form from page xix once they have completed the CEFR checklist in the book. Ask them to keep these forms in their portfolio folder as well. Finally, encourage students to choose several pieces of their work from different points in the year in order to compile the dossier that will appear in their portfolio.

2 Skills

We're twins!

We're 12 years old and we're from Seattle in the U.S.
 Our birthday is in June. Our zodiac sign is Gemini – the sign of the twins. We aren't the only twins in our family. Our mom, Sue, and her sister, Aunt Cathy, are also twins. Our cousins David and Matthew are six months old, and they are twins, too – but they aren't identical. We're students at Lincoln Middle School, but we aren't in the same class. We aren't the only twins at our school. Four of our friends from school are also twins! And two are in my class!

Twins with a difference. We're twins, but we're very different people!

Louise
 Books are my passion. My favorite writers are Veronica Roth and Suzanne Collins: *The Hunger Games* books are awesome. The movies are great, too. Lucy isn't interested in books. Her passion is rock music. Ugh! It's terrible!

Lucy
 Rock music is my passion. My favorite bands are 30 Seconds to Mars and Muse. They're amazing! Louise isn't a rock fan. She's a pop music fan. Her favorite band is One Direction!!! Ugh! They're boring!

Psst! Our secret!!!

'I'm 1.65 m tall and Lucy is 1.63 m tall!'

'Louise is right-handed and I'm left-handed!'

Talking about dates

Aim

To present and practice talking about dates

Warm-up

- Review numbers from 1–100 by asking students to count around the room, with one student saying each number in turn.
- You could do this as a game, with students standing up at the start and sitting down if they make a mistake or cannot think of a number. You could make it more challenging by going round again, asking students to count in twos or threes (*three, six, nine*, etc.).
- Continue until students are comfortable with the numbers.

Exercise 1 1•65

- Read out the first few ordinal numbers and ask students to translate them into their language.
- Students work individually or in pairs to complete the table with the ordinal numbers.
- Play the audio. Students listen and check.
- Play the first part of the audio again, from *first* to *tenth*, pausing after each number for students to repeat, individually and chorally.

Audioscript Teacher's Book p.111

Exercise 2 1•66

- Briefly review the months by writing *January* on the board and eliciting the remaining months. Write them on the board as you elicit them.
- Play the audio for students to listen and choose the correct words. Check the answers, then play the audio again, pausing after each line for students to repeat individually and chorally.

Audioscript Teacher's Book p.111

Exercise 3 Pairwork

- Go through the *Look!* box and the *Learn it, use it!* chart with the class. Check that students understand everything.
- Read through the words in the box and check that students understand them all.
- Allow students time to prepare their answers individually, then put them into pairs to ask and answer questions.
- Monitor and help as necessary. Ask some pairs to ask and answer some of the questions for the class.
- You can show students some short video clips of native speakers having similar conversations on iTools or the DVD.

Extra activity

- Students can work in pairs to test each other on dates. Ask students individually to write down three dates, without letting their partner see.
- Students take turns to read out their dates to their partner. Their partner must write the dates. Students can then compare their answers and see how many they have said and written correctly. Students can practice again with a different partner for extra practice.

Consolidation

- Tell students they should learn some important dates in English, e.g., their own birthday, the birthdays of friends and family members, and the dates of important festivals or events. Warm-up

- Write the word *celebration* on the board, and teach the meaning. Ask: *What celebrations are there in your country?* Elicit some ideas, e.g., Christmas, Easter, Carnival, etc. Ask: *What's the date of those celebrations?* Briefly review dates if necessary.

Background notes

- The thirteen original colonies of the U.S. declared their independence from Britain in 1776. This led to the American War of Independence, which ended in 1783.
- As well as celebrating the arrival of the first Europeans in the U.S., Thanksgiving Day also celebrates the first successful harvest of crops by the settlers. It therefore also functions as a "harvest festival".
- Christopher Columbus (died 1506) was an Italian explorer who is generally credited with 'discovering' America. Although he was not the first European to reach America, his voyages led to the subsequent European colonization of the land.
- Martin Luther King (1929–1968) was an American pastor and civil rights activist, who campaigned for equal rights for African Americans, using non-violent civil disobedience. He was assassinated in 1968.

Life at a Soccer Academy

Arsenal F.C. is a famous soccer club in London. The club has a special soccer school for talented soccer players – The Arsenal Academy. The students at the Academy come from different countries. Here, two young soccer stars talk about their lives at the Academy.

Daniel Costa

"I'm 16 years old and I'm from Brazil. I study at the Arsenal Academy and I live in London with the Wilson family. I share a bedroom with Cedric Piveau.

On weekdays, we get up at seven o'clock, and we have breakfast. We go to the Academy at eight thirty. We usually practice from nine to twelve o'clock. We sometimes practice with famous soccer players.

In the afternoons, I study sports science. It's interesting, but I prefer playing soccer!"

Cedric Piveau

"Life at The Arsenal Academy is cool, but I miss my family. They live in Ivory Coast in Africa. I only see them in summer. In the evenings I often chat with my sister on the internet. I share a room with Daniel Costa. He's an incredible player! In the mornings, we practice with the team. In the afternoons, I study English.

On weekends, we usually play games against teams from other clubs, for example Liverpool F.C. and Chelsea F.C. At the moment we're the number one club!"

Aim

To read and understand an article about schools with a difference in different parts of the world

- Around 90,000 children attend boarding schools in the U.K., mainly in private schools. Most of these children go to boarding school at the age of 13, but around 10,000 children under the age of 13 also board. Boarding schools have been in decline in the U.K. for many years, but enjoyed an increase in popularity following the Harry Potter movies.

Difference!

Hi! I'm Scott. I live on a farm in Australia. I study at home because my school is 400 km away in Alice Springs. It's called the "Australian School of the Air." My classes are online. My classes are from 9 a.m. to 3 p.m. I have a webcam on my computer, and I can see my teachers. My school subjects are normal, but I don't have P.E. After class, I ride my horse.

My name's Dorian. I go to a boarding school in the U.K. It's a school for boys. We live at school and go home for vacations. Classes are from 8:30 a.m. until 3:15 p.m. After class, there are extra activities. I'm in the school orchestra, and we practice on Tuesdays. We wear uniforms on weekdays, but not on weekends. I like my school, but I sometimes miss my family.

Hello, I'm Kaitlin. I go to Native Island School in Maine, in the United States. It's a school for Native Americans. My family are Penobscot Indians. At my school, we have native studies. I really like this subject. We learn about the history, culture, and music of our people. We also have Penobscot language classes. There is an after-school program of traditional activities. I go canoeing. I love my school!

American teenagers have a busy life. The typical school day lasts about six hours, from 9 a.m. to around 3 p.m. After school, many students do other extracurricular activities. Then, in the evening, they do their homework. It's a long day!

At school
All students do "core" subjects like math, science, and English. They also choose optional subjects called "electives." Drama, a second language, and technology are typical electives. Different schools have different electives.

After-school activities
Many American students spend their free time at school! Most American schools have after-school activities, for example choir, dance, music, and book club. Some schools have unusual activities, for example, movie making and cooking.

Sports
A lot of American teenagers play sports and there are a lot of school clubs. Girls like basketball and volleyball. Boys usually like football (the American kind) or baseball. Some teenagers go to local sports clubs. Girls often swim or play tennis, and skateboarding is popular with boys.

At home
American teenagers watch TV and play video games. They often use the Internet. They download music or chat with friends on social networking sites. Some teens do these activities for over four hours a day!

NEW YORK STYLE

Young people in New York City are famous for their cool and trendy style. So what are teenagers wearing on the streets of New York today? Our reporter Sasha Westwood takes a look at New York street style.

Alex's look:

Hoodie: \$45.95
Jacket: Free (Grandpa)
Jeans: \$84
Sneakers: \$38
Total: \$167.95

Gerl's look:

Jacket: \$32.50
Skirt: \$64
Hat: \$8
Tights: \$6.95

Total: \$151.45

Name: Alex Coburn
Age: 17
Location: Harlem, Upper Manhattan, NYC

Sasha: What are you wearing today?
Alex: Um ... I have a black jacket and a brown hoodie. I'm wearing a gray cap, jeans, and brown sneakers. They're old, but I love them.

Sasha: Your jeans are great. Where are they from?
Alex: They're from Dr Jay's. It's a clothes store in Harlem. It has cool clothes. It's my favorite store.

Sasha: Is your jacket from Dr Jay's, too?
Alex: No, this is my grandpa's jacket. It's from the 1950s! It's vintage!

Sasha: Wow! Go Grandpa! It's great. Your look is very cool. Do you always wear vintage clothes?
Alex: No, I don't. I usually wear casual clothes. But I sometimes want to be different and I create my personal style.

Name: Gerl Maxwell
Age: 16
Location: Greenwich Village, Lower Manhattan, NYC

Sasha: I'm talking to young people about their style. Can I ask you some questions?
Gerl: Yes, of course.

Sasha: Can you describe your outfit? What are you wearing today?
Gerl: I'm wearing a white hat, a red jacket, and a short plaid skirt. I have black tights, white boots, and black gloves.

Sasha: I love your look! It's very original. Where are your clothes from?
Gerl: Well, my jacket is from a thrift store and my boots are from Hell's Kitchen Street Market on 39th Street. They're secondhand. But my skirt is new – it's from Urban Outfitters.

Sasha: What are your favorite clothes stores?
Gerl: I love thrift stores and markets because I like vintage style and the clothes are cheap.

Sasha: Who are your style icons?
Gerl: I love Selena Gomez. Her clothes are amazing.

Culture club

Shopping in the U.S.

1 "I buy clothes there, I like to be different, and I can always find unusual things in these stores."
Tania, 13, Boston

2 "I go shopping with my friends on Saturday mornings, and then we have lunch. In the afternoon, we sometimes see a movie."
Katie, 14, Dallas

3 "I sometimes buy clothes on a sports website. It's very cheap. My mom pays with her card."
Dan, 13, Seattle

4 "It's a great place for cheap gadgets and CDs, but not for clothes. There aren't any changing rooms!"
Tim, 14, San Diego

The Mall
The mall has hundreds of different stores in one building. You can find all the designer brands. Modern malls are also great for a day out. There are restaurants and movie theaters. Some malls have sports centers, ski slopes, and skateboard parks. And one big mall in Chicago has a zoo!

Thrift Stores
Today it's cool to buy secondhand clothes at thrift stores. Thrift stores are cheap. You can also buy vintage clothes and create your personal style. Many young people are "green" shoppers. They prefer to re-use things, and help the environment.

Markets
Markets are exciting places! There are a great variety of cheap things. Some street markets sell secondhand things, too. These markets are very popular. There's often a great atmosphere with street performers and musicians. You can also buy a hamburger or a hotdog at a food stand.

The Internet
Shopping on the Internet is fast and easy. Big stores have websites for online shopping. Over 40 percent of American teenagers buy online, for example, clothes, music, or electronic gadgets. It's easy to compare prices on the Internet. But it's also easy to spend a lot of money!

1 2-48 **Read and listen** to the article. Match the names with the shopping options.

1 Tania b	a the Internet
2 Tim d	b thrift stores
3 Dan a	c the mall
4 Katie c	d markets

2 **Read the comments. Choose the best shopping options for the people.**

"I like shopping with my friends, and then we see a movie." Phil the mall

1 "I don't like shopping." Paulo the Internet

2 "I never buy expensive clothes. I create my own style with vintage clothes." Elena thrift stores

3 "I prefer designer clothes." David the mall

4 "We go on Saturdays and we eat lunch there." Kate the mall

5 "I love the street food." Marcus markets

3 **Presentation** Answer the questions below. Then prepare a short presentation about shopping in your town.

<ul style="list-style-type: none"> • What malls are there? What can you do at the mall? • Are there any markets? What can you buy there? • Where can you buy secondhand things? 	<ul style="list-style-type: none"> • Do many people buy secondhand things? • Where do you and members of your family go shopping? • Where do you buy your clothes? Why?
--	--

Culture focus

Most thrift stores are "charity" stores. People give things they don't want to these stores. The store workers are often volunteers. The money people pay for things goes to the store's charity.

Check it out!

Find these words and check their meaning.

Extra activity

- For homework, students could choose a city in the U.S. or another country and find out about shopping there. Most cities' tourist websites have information about shopping options. They could find out about large stores, shopping malls, markets, etc.
- In the next class, students could give a presentation on shopping in the city they chose. When all students have given their presentations, ask: *Which cities have good shopping options? Where do you want to go shopping? Why?*

The International Space Station

The International Space Station (ISS) is an international project between fifteen countries including the United States, Russia, Japan, Brazil, Canada, and ten European countries. Astronauts of different nationalities live on the space station. They are all scientists and engineers. Suni is an American engineer. She's here for six months, and this is her second mission on the ISS. Here she describes her daily life.

FLOATING IN SPACE

1 Life on the space station is cool! There's air inside, and we wear normal clothes. There's no gravity, so we can float in space. This is fun. But it's impossible to walk or take a shower. The toilet is difficult, too! We sometimes go outside when there is a problem with the station. We wear special space suits for this.

DAILY ROUTINE

2 I always get up at five o'clock and have breakfast. Then I clean my teeth and wash. I work for about ten hours every day. I do science experiments in the laboratory. I have lunch at twelve o'clock, and then I work until dinner at eight o'clock. It's a long day. I usually sleep for about six hours at night.

EXERCISE

3 I always do two hours of exercise every day. There's a gym on the station with special exercise machines. This is an important part of our routine because we don't walk or play sports. I run and I use the gym bike. It isn't very exciting!

BEAUTIFUL EARTH

4 We usually have some free time before we go to bed. I write e-mails and chat with my family on the video link. We often listen to music or watch DVDs. But my favorite activity is watching the Earth. It's very beautiful!

GOING HOME

5 It's important to keep the station clean. We always clean up after meals. We don't use water. We have special towels. The Soyuz spaceship is our transport vehicle. It transports food and other things, and it takes our trash. It also takes us home!

Nutrition and Sports

What is a well-balanced diet?

Food is very important for your health. Different types of food contain different nutrients. There are three main types of nutrients – protein, fat, and carbohydrates. Protein is important for your muscles, heart, and other body tissues. It makes them strong. You get protein from fish and meat, and also from milk products. Teenagers need a lot of protein because their bodies are growing. Carbohydrates give you energy or “calories.” You get carbohydrates from pasta, rice, potatoes, and cereals. Fat and sugar also give you calories. Cheese and chocolate have a lot of fat.

Your body also needs vitamins, fiber, and minerals. These nutrients keep you healthy. For example, vitamin C is important for your hair and skin. Fruit and vegetables have a lot of vitamins. Calcium is an important mineral for strong bones. Milk products, like yogurt, are rich in calcium.

Sport and diet

Most teenagers only need between 1,600 and 2,400 calories a day. But you need more calories when you play sports. And it's important to eat the right food. You can't play soccer for 90 minutes or win a three-hour tennis game if you eat hamburgers and fries every day! Top athletes have special diets. They eat high-calorie and high-protein diets. Protein gives them strong muscles. Carbohydrates give them energy to run and jump. A tennis player burns about 700 calories every hour when he's playing. Tennis champion Andy Murray drinks six liters of water, and eats 6,000 calories in six meals every day when he's practicing! An average man only needs about 2,500 calories. But the average man doesn't practice for six hours a day!
